## Chapter 1 : Planning a Homeschool Christmas Party That Kids Will Enjoy: Decorating, Snacks, and a Fun

*Sycamore Tree is a Christian company so even their materials that are considered secular will be pretty non-offensive to many Christians. Beside a couple things in science a Christian family who chooses can explain the differences in beliefs or gloss over it.*

If you belong to a homeschool group you will probably already have a Christmas party planned. However, not everyone belongs to a group: This writer and her daughter do not, but they still plan a party at home. We can then plan our Christmas party and invite a few of those families. This makes the party much more fun. Christmas is a great time to get together with family. We make several Christmas crafts days before the party and use them for our decorations. This can even be a blessing to the families that come to the party. They will want to know how you made the crafts so that they can use them with their children. Make sure your Christmas tree is up and you have all of the lights you want already on your house. A few streamers are also festive--use Christmas colors. We always have a pot of meatballs cooking for meatball sandwiches. We love to make some Christmas cookies and gingerbread the day before the party. We decorate them with icing and jimmies. We also put out some candy canes and red and green Hershey kisses. Make little stockings as party favor bags. Use a hole punch to punch holes around the edge of two paper stockings. Have the students use lace or yarn to "weave" the two paper stockings together. We use the Chipmunks Christmas Carols as the background music for the game. Another great game is pin-the-nose on Rudolph. You can make your own giant Rudolph out of posterboard and then make a bunch of red noses with construction paper. Write the name of each child on the nose and then add a piece of tape to the back. This is a group effort and brings forth many laughs. I find that it is worth cleaning up when I think about all the fun everyone had making it. You can also award the finished product as a prize to the person who draws the sheet of paper that says "Gingerbread House" on it. Prepare this drawing by putting pieces of paper in a big bag. They are all blank except for one with the words "Gingerbread House. The only difference is that you will want to elicit help from parents. Another word of wisdom: Create the structure of the Gingerbread House the night before the party to ensure that it is "structurally sound" prior to decorating.

**Chapter 2 : How to Teach Kids Financial Responsibility - Five J's Homeschool**

December Writing Prompt Calendar The December writing prompt calendar is full of winter and holiday-themed writing prompts. Each month we are offering writing prompts you will be able to find them all on the main Homeschool Writing Prompts page , and you can download our December-themed prompts below. Thoughtfully handmade decorations and gifts always seem to have a willing recipient or admirer, and there is something special about creating something that will be seen and enjoyed by others. Whether you are someone for whom crafting comes naturally or someone who wants to find a way to make more creative opportunities for your children, there are many ways to weave crafts and activities into the holiday season. When our family was young, normal homeschooling routines went out the window. We hung on through Halloween, but Thanksgiving was a clear line of demarcation: Why should homeschoolers worry less about schoolwork during the holidays and embrace the season? My husband comes from a huge gift-giving family. I come from a family in which money was always tight and gifts tended to be few but meaningful. We both have a faith that leads us to condemn unmitigated materialism, convicts us about our prosperity amongst a world of poverty, and challenges us to find a balance between the joy of giving and the selfishness of indulging. And doing kind of comes with the territory. The niggling question pricks every year at the same time: What do we do about Christmas giving? As irony works, I sifted through the most recent wave of gifts arrived via mail right after coming home from set-up efforts for the weekend Christmas Fair to raise money for impoverished orphans in India. Yet in spite of all of the conscientious preparations, it seems that the same question arises every year: Did we do enough? Having special routines that you do year after year helps children develop an excited expectation for the holiday to come, and builds family unity and bonding. The whole month of December is an amazing opportunity to establish family traditions – rituals that ground children in their roots and help them to create meaning and a sense of belonging. Family traditions help to mark shared experiences, encourage intimacy and connection, and help children to identify in a positive way with their families. This month provides so many opportunities for creative, fun learning as families help children prepare for Christmas. To get the most out of the holiday, why not try a special study to prepare for Christmas? Christmas lapbooks, Advent devotionals, unit studies – the possibilities are endless! Santa asks it, parents ponder it, and even passersby on the street use it as a greeting line for children. But is it the question homeschoolers really want to ask? Just like home educators seek to teach their children academic subjects, many also seek to inculcate something even more important – character. And this time of year is the perfect time to focus on the character quality of giving to others. The enigma of gift giving for children becomes even more challenging for homeschoolers who wish to bequeath presents that will be useful and worthwhile even once the Christmas glow has dimmed. And while that new English curriculum might be what a homeschooling mother would enjoy seeing under the tree, her children might not be quite so excited. Where do homeschoolers go to find gifts that are educational in nature, but that children will also enjoy? But many homeschoolers seek to move beyond the cultural harbingers of the season to focus on the birth of the Christ child; to celebrate God coming to earth. One of the most meaningful ways to help the family emphasize the true meaning of Christmas is through creating a Jesse Tree. This wonderful tradition not only centers the significance of the holiday around Christ, but it serves as an advent calendar as well, marking each passing day to count down until Christmas.

Weaver Curriculum - A unit-based home education for children from preschool through high school that teaches fundamental knowledge and learning within the larger context of the Scriptures. Provides wholesome family entertainment! Please email us to suggest a link or make corrections.

## Chapter 4 : North County San Diego Homeschooling ( Guide) | YNC

*Filed Under: Planning & Organization · Strategies & Tips · Homeschool Planning · Homeschooling 7 Habits of Highly Effective Homeschooling The 7 habits of effective homeschooling should be considered while you are considering homeschooling.*

Karen Doll I remember our first day of homeschooling like it was yesterday. Emily was 5 and Jeremy was almost 3 years old. It was September—the time of apple harvests, the beginning of autumn, and the first day of school for many. It was our first day, too. In the beginning, we followed the traditional public school schedule. This was new territory for me, and I felt safe wrapped in tradition. Looking for a curriculum your kids will like? An online homeschool curriculum can open new doors by creating an interactive learning experience that brings concepts to life. Homeschooling should be fun. With Time4Learning, it can be! Well, fast forward several years. I no longer needed the safety net of tradition. After a bit of trial and error, we discovered year round homeschooling. I was in love. Homeschooling through the year is a veritable smorgasbord of possibilities. Is she off her rocker? I do know that the mere mention of homeschooling year round conjures up images of weariness and no school breaks. Come along with me and follow my tips for a successful year round homeschooling experience. Year round homeschooling just might be your new best friend. Create a Unique Family Schedule A personalized schedule is at the heart of year round homeschooling. One of the reasons that we chose to homeschool year round was our relationship with summer heat. We were genuinely content to while away the summer feeling cool and comfortable while logging in extra homeschool days. Creating a year-long schedule may seem rather daunting at first — there are a lot of things to consider. If you need a little inspiration, take a look at some of these common year round schedules: Do you take a vacation every year? Think about this when creating your schedule. In fact, one of the bonuses of year round homeschooling is the freedom it allows—you can take a vacation any time of the year. Even if your kids participate in co-op classes or take dual-credit college courses, you should be able to work out a plan to make up any missed work either prior to your trip or when you return. Simply Convivial to the rescue—fellow homeschool mom, Mystie, shares her tips for creating the best year round homeschool schedule for your family. Be Flexible Flexibility is a must. Being flexible is especially important when you school throughout the year. What was preferred in the beginning, may now summon up moans and groans. Routines get old quickly. So jazz it up a little. Mix in surprise field trips. Add dashes of interest led learning. Yes, you can really do that. Take Real Breaks Everybody needs a break now and then. Breaks confirm to your kiddos that you are indeed human and not a robot. Most importantly, breaks should be a time to bond in non-educational ways. Opportunities abound—mini-lessons lurk around every corner. Your children will thank you. I am living proof. Breaks are a wonderful way to reconnect with each child in a special way. Spend some quality time together playing a favorite card game, watching a marathon of your favorite television show, going on a mother and son dinner date. For you sports enthusiasts, grab your tennis rackets and hit a few or challenge your Olympic-ready swimmer to a race. In many states, homeschoolers must log a specific number of days. So in order to comply with your state law, some of those lazy, hazy, crazy days of summer will have to be a little less lazy. Homeschooling during the summer need not be as comprehensive, though. For us, summer school meant the weeks following July 4th through the middle of August. We also only covered the basics—each child received a unique journal prompt, several math problems, a paragraph for proofreading, and regular reading. It also helped that my children participated in the summer reading program at the library every year—readers received little prizes and incentives for books read. Summer is also a perfect time to conduct a little experimentation. Encourage Feedback Feedback is the ultimate tool in evaluating your year round homeschool program. Everybody has an opinion, so let them be heard. A great time to evaluate the success of your year round schedule is at your first major break. If you take smaller regular breaks such as with 4 day weeks through the year, gather everyone together after a month or so. Ask for feedback from everybody: What

## Chapter 6 : Knowledge House - Online Courses

*Story of the world Homeschool Curriculum Homeschool - kindergarten Homeschooling Social studies Notebooks Teaching history Teaching Tools Teaching Resources Forward Our history curriculum of choice is The Story of The World.*

Homeschooling can be an excellent way to give your child a diverse and interesting education. You might also have to factor in the cost of transitioning to a one-income household so that one parent is home to teach. Homeschooling is the fastest-growing form of education in the United States, with more and more parents choosing to homeschool their children instead of sending them to public school. Internationally, the rise is even more pronounced. The BBC reports that in the U. Parents choose to educate their children at home for a variety of reasons, including:

**A Desire for Religious or Moral Instruction** Some parents choose to homeschool because they want their children to learn in a more moral and religious environment. Homeschooling allows parents to structure their curriculum around their religious beliefs.

**Special Needs Requirements** Children with special needs often require more personalized attention than a public school teacher can provide. A child might have a physical handicap, learning disability, ADD or ADHD, or another condition that makes it difficult if not impossible to learn in a traditional classroom setting. Homeschooling allows parents to set up a learning environment specifically tailored to the special needs of their child. This can help ensure the child gets the attention and care they need to reach their full potential.

**Building a Stronger Relationship** Many parents choose to homeschool because they want to spend more time with their children. Childhood passes in the blink of an eye, especially once elementary school starts and kids are away from home for much of the day. During this time children are sedentary and isolated from their parents. Homeschooling takes drastically less time. Generally, elementary-aged homeschoolers spend two to three hours on schoolwork per day, while middle and high school homeschoolers spend three to four hours on schoolwork.

**What About Academic Performance?** Some question whether homeschooling can provide a quality education compared to public or private schools. For example, students from wealthier families often enjoy greater curriculum and enrichment opportunities. In addition, many homeschooling studies use volunteers, and parents of children who test well are more likely to volunteer their test scores for the study. This lack of random sampling can skew the results. One of the most balanced is a study published in the *Canadian Journal of Behavioral Science*, which found that homeschoolers with highly organized lesson plans achieved higher standardized scores than public school students. Unsurprisingly, homeschoolers with less-structured lesson plans had the lowest scores of all groups studied. Homeschooling has a steep learning curve. Most homeschool teachers are parents without a formal teaching background who must learn how to choose, organize, and teach a curriculum on their own. The interactions and friendships made in a classroom setting can provide a wealth of opportunities like teaching kids how to get along with others who are dramatically different from them. They make friends, play games, and encounter ideas and viewpoints they might not run into otherwise. The limited research conducted on the socialization of homeschoolers suggests that, for the most part, homeschooled children have just as many if not more opportunities for socialization as public school kids. They are happy, optimistic, and satisfied with their lives. Their moral reasoning is at least as advanced as that of other children, and they may be more likely to act unselfishly. It all depends on how much each parent wants to spend on curriculum, supplies, and field trips. Many parents say their first year of homeschooling was their most expensive.

**Homeschooling Can Save You Money** While homeschooling can present many upfront costs not found with a public school education, there are also many ways in which homeschooling can be cheaper than public school. They can go to school in their pajamas if they want to. These expenses add up. Many teachers ask parents to provide a packaged snack for the class once a month, and buying snacks for an extra 25 to 30 kids can add up. Vacations Homeschooling can also help you save money on family vacations. When you homeschool, you have a flexible schedule.

**Fundraisers** I can hear all parents give a collective groan at this item. The school fundraiser is supposed to do

two good things: This often includes shelling out some of their own money on high-calorie chocolate or stale popcorn just to get some additional names on the donor list. You can spend as much or as little as you want. And there are plenty of ways to give your kids a wonderful and comprehensive education without breaking the bank. Plenty of publications can help shorten the learning curve and save you from making expensive mistakes. These publications provide a wealth of tips and ideas for how to save money. You can also visit HomeSchoolReviews. Find Resources Online The Internet is a treasure trove for homeschooling parents looking for ideas to help build their curriculum. There are hundreds of sites that offer free printable resources for kids of all ages. A simple search can yield worksheets, coloring pages, craft ideas, and games. With classes and curriculum for K through 12 students, Khan uses interactive programs and video clips to make learning fun. Starfall is an interactive reading website geared to early learners, particularly preschoolers and early elementary school students. Kids can start by learning their ABCs and progress up to reading. ClickSchooling sends out free, web-based curriculum ideas every day, each with a different theme i. Monday is math, Tuesday is science, Wednesday is language arts. Only Passionate Curiosity puts together a comprehensive list of free curriculums and resources organized by subject, providing hundreds of free resources. For a low fee, subscription sites can give you access to even more educational resources. They also have curriculum available for each grade level from pre-K through 12th grade. Children ages 2 through 13 can use games and interactive lessons to start by learning their ABCs and progress up to reading. Older students can get a jumpstart on college prep through OpenCourseWare OCW programs at participating colleges and universities. Parents can also access the curriculum for free and use it as a guideline to teach everything from poetry to politics. Complete course materials “ including lecture notes, handouts, and exam papers ” are usually available at no cost to participating students. Coursera offers free online college classes from universities like Stanford, University of Michigan, and Duke. World-renowned professors teach nearly every subject, making this a great platform for teens to start learning at the college level. Academic Earth offers free advanced-level courses on dozens of subjects from universities like Stanford, MIT, and Berkeley. Dive Into the Blogosphere Ten years ago, there were only a handful of blogs about homeschooling. Today, there are tens of thousands, if not more. Homeschooling blogs provide a wealth of information from parents already in the trenches. Many compile link roundups full of freebie ideas and materials for homeschoolers. Popular homeschooling blogs and websites include:

## Chapter 7 : Sycamore Tree curriculum | Homeschool Spot

*Sycamore Academy's experienced and qualified teaching professionals light the way for students to transition through each grade level and on to college. Video teaching is a great resource, but our students have found that having a "live" teacher enables them to ask real questions and receive instantaneous help that isn't available by video.*

Blueprint Education formerly Phoenix Special Programs and Academies Since , the goal of this Arizona-based non-profit organization has been to offer distance learning courses and high school diploma programs that are fully accredited and meet graduation requirements. Students may take courses to make up classes or accelerate the educational process in order to graduate early. Blueprint Education is a a private tuition-based distance learning school, but they also operate Hope High School Online which is a publicly funded charter school. Calvert School Online Calvert School has been educating children since Calvert Interactive is their premier online learning program featuring live classes taught by a Calvert Online Instructor for Sixth through Eighth Grade students. In addition to the live, interactive classes covering math, grammar, reading, and composition, students have access to pre-recorded lectures for science, history and geography. These lectures, delivered by a Calvert Online Instructor, reinforce your instruction in the home and allow for greater pacing flexibility. Captive Thought Tutorials Small, interactive, live online classes offer a rigorous but enjoyable study of English literature, inspiring students to love the written word and to seek to understand it in light of the gospel of Jesus Christ. They are designed for motivated, homeschooled high school students who enjoy reading and can work independently. Students may enroll anytime, study at their own pace, and earn credit for courses as they are completed. CMA accepts transfer credits from homeschool students as well as students from public and private schools. They are self-paced online tutorial-type programs using rigorous instructional content. Students focus on completing one course at a time, but may switch to a second course temporarily for variety or when waiting for assistance from the mentor. In addition to each online course, students must complete a practical application component. Courses designated as Certificate Program Courses and Institute of Theological Studies courses require the payment of a course enrollment fee. All other courses are offered free of charge. Certain free courses may suggest the purchase of a textbook s or other materials in order to enhance the learning process. The only free course that requires the purchase of a textbook is Foundations of the Christian Church. For all other courses, the textbook is a helpful supplement to your learning, but not required. The courses remain tuition free for students who do not require course completion credits or a formal, printed certificate. Christian Writers Guild Now you can take e-mail correspondence courses with a professional writing mentor! The Page or Squire programs can serve as creative writing classes for homeschooling students. Each month course is packed with 20 engaging lessons sure to challenge and strengthen the aptitude of any budding writer. At a pace of just two lessons per month, these e-mail correspondence courses are a manageable addition to other academic and extracurricular activities. Classical Liberal Arts Academy William Michael, a high school classics teacher and homeschooling father of six, is the author of the Classical Liberal Arts curriculum. This one-time fee includes all study materials, instruction, grading, assessment, record-keeping, and communication. Study materials are provided electronically by e-mail or download but can be obtained in printed format for an additional fee. Great Books for assigned reading may be read online or borrowed from a library. Compuhigh Since , CompuHigh has provided an online accredited high school diploma program and courses. CompuHigh seeks to provide a supportive, challenging, and alternate learning environment. Students are encouraged to be in charge of their education, giving them the opportunity to develop creativity, independence, responsibility, time management and critical thinking skills. We emphasize mastery of all academic courses, allowing students to view themselves as capable of achieving their educational goals. Compuhigh offers 3 programs to suit the need of homeschoolers, students who need extra credit, or a full online high school diploma curriculum. The Content Commons contains educational materials for everyone " from children to college students to professionals " organized in small modules that are

## DOWNLOAD PDF 101 GREAT HOMESCHOOL TEACHING TIPS FROM THE SYCAMORE TREE

easily connected into larger collections or courses. Connexions modules are like small "knowledge chunks" and collections are groups of modules structured into books, course notes, or other uses. Their open license allows for free use and reuse of all content. Browse by subject, popularity, title, author, etc. The syllabus, posted on the class home page, lists the reading and listening assignments for each week and offers a flexible schedule for homework. Every two weeks, students can participate in a live chatroom discussion - hosted by Mike Farris - to ask questions and discuss the material. Twice during the class, students will submit essay exams for grading. A certificate of participation will be awarded to all students at the end of the class.

### Chapter 8 : preparing for high school free webinar [racedaydvl.comeschool](http://racedaydvl.comeschool) Ways

*Find this Pin and more on Homeschool by Lily Teague. Teaching multiplication can be challenging for students, but there are many ways to make it fun! The sycamore.*

First of all, Mr. Bullington will share about preparing for high school and how to simplify the high school experience. In addition, he will provide you with three PDF downloads that will help you get organize with your goal setting and follow-up. To sign up for the webinar, [click here](#). I am excited about this new partnership between HomeschoolWays. Even more, I am excited to provide my readers with access to experts who can help. Have you noticed how fast time flies? Therefore, let me just say this: In my experience, it always helps to look ahead, plan ahead, and keep an eye on the goal – getting into college with scholarships. Eyes on the Prize You probably know that my oldest will start fifth grade in a week. Seems like things will get a bit more serious. He used to be my kindergartner. Then, he was in first grade, second grade etc. Suddenly, he is in fifth grade. Where did the years go? A few months ago, I wrote a post about the middle school curriculum we plan to use. Also, here is a post about how to plan for middle school. Looking back on these posts, written eight months ago, I can already see how I have changed my plans in some areas. Preparing for High School Looking closely at this situation, preparing for high school may seem almost unnecessary for a mom with a fifth grader and a third grader, but you know me. Above all, I like to be prepared. In general, we make plans so that we can modify them as we go. If we do not make plans, how do we know we are still walking toward our goals? Consequently, we should all look to the future, the distant future for some of us and the not-so-distant future for others. Because preparing for high school does not have to be scary. Maybe you remember how scared you were about teaching your child to read? And yet you did it. Most noteworthy, you did it just fine. Now here you are, wondering if you can homeschool through high school. Can I just tell you? And Matthew Bullington will help you start planning for it through this webinar on Wednesday. To sign up, follow this link. Please follow and like us:

### Chapter 9 : Year Round Homeschooling: 5 Tips for a Successful Year

*It is with great pleasure to announce the launch of the new Sycamore mobile app! Over the summer months, our mobile app team was hard at work to develop an app that would make teachers', families', and students' day-to-day Sycamore activities both easier and more accessible.*

Here are just a few popular choices: The Classical Academies have campuses in Escondido and Vista. Their third campus, Coastal Academy, is in Oceanside. The Classical Academies have programs for transitional kindergarten through 12th grade, with choices that combine classroom and home study. They strongly emphasize science and the arts. Pacific View Charter Schools is in Oceanside and they offer homeschool options for kindergarten through 8th grade. The school emphasizes a personalized learning model and creates individual education plans that fit each student. Pacific View has several online classes and a small workshop-based program for students in 9th grade. Besides educational guidance and supervision, they offer workshops two days a week in subjects like Musical Theater, STEM, Drawing Fundamentals, and more. Inspire Charter Schools has an Enrichment Academy location in San Marcos where students attend one day every week and have classes in math, language arts, and electives. Spelling bees, community service, and project opportunities are also available at the EA. Specializing North County has several private charter school options. Just like public charter schools, they offer curriculum guidance, academic oversight, field trips, and classroom courses that complement the home study portion. Private charter schools are more affordable than private schools but usually, charge tuition. Often they provide a different approach to education, such as classical, Waldorf, Montessori, or include religious instruction. Convenience and Freedom Private Satellite Programs are registered with the state as private schools but tend to be less hands-on than charter schools. They maintain records and are happy to advise parents, but the family has complete freedom to choose their own curriculum and define their own success. PSPs also organize field trips, park days, and offer enrichment classes. Some PSPs offerings are quite extensive. There are fewer options in the North County area. Escondido Tutorial Service offers programs for older students that are academically challenging and strongly focused on the classic literature of Western civilization within their historical context. The families form a cohesive community. Students with ETS receive a diploma and participate in a formal graduation service. Classical Conversations is also a rigorous classical program that is run in local groups. Students follow a curriculum and address the material in weekly Socratic discussion groups. Check out the website for more information about the program and the groups that meet in the area. Park Days and Enrichment Courses Park days are either organized by satellite groups or more informally, by area homeschool parents. They are a great way to connect with other parents and kids of similar ages. They can include dance, music, sports, robotics, or surfing – just to name a few. Oceanside Homeschool Connection is a park day and support group that meets in area parks each Wednesday from noon to 4 pm. It is for children ages 18 months to 8 years old. It allows them to explore and learn experientially. Soaring Minds provides classes and activities either on a 1-day per week or 2-day per week schedule. They also host Homeschool seminars for parents and a summer camp. Any homeschooler can attend, but Soaring Minds does participate in some charter schools vendor programs. Soaring Minds has North County classes in Oceanside and plans are in the works for an Escondido site, too. Mini Theatre Troupe is a homeschool theater group that seeks full-involvement from everyone. By the time the rehearsals are done, a full production is ready to be performed, and everyone performs in every number! San Diego Skateboarding is taught by professional skateboarder Mike Owen. EMH Sports is a national organization that provides physical education courses for homeschoolers. They have five class sites in North County: California Athletics is another service that has been offering sports and physical fitness for homeschoolers. They have courses in soccer, track and field, and fencing classes coming up. Todd also organizes sports leagues, track meets, and watersports activities. Special Fishes teaches swimming to kids with sensory issues, autism, special needs, and strong fears or other challenges. They have a special method – Canine-Assisted-Swimming. Gentle service
