

Chapter 1 : CrowdStrike - Global Threat Report on Behance

The CrowdStrike® Global Threat Report offers one of the industry's most comprehensive reports on today's most damaging cyberattacks and dangerous adversaries. It contains valuable insights into the evolving threat landscape and includes recommendations that will help you be better prepared for.

In addition to detailing key trends driving adversary targeting and a deep dive into the key factors shaping the targeted intrusion campaigns of notable nation-state adversaries, including China, Russia, Iran, North Korea, etc. Based on observed incidents, CrowdStrike established that the average "breakout time" in was one hour and 58 minutes. Breakout time indicates how long it takes for an intruder to jump off the initial system they had compromised and move laterally to other machines within the network. In , 39 percent of all attacks that CrowdStrike observed constituted malware-free intrusions that were not detected by traditional antivirus, with the manufacturing, professional services and pharmaceutical industries facing the most malware-free attacks. The propagation of advanced exploits has blurred the lines between statecraft and tradecraft, evolving the threat landscape beyond the defense capabilities of conventional security measures. Extortion and weaponization of data have become mainstream among cybercriminals, heavily impacting government and healthcare, among other sectors. Nation-state-linked attacks and targeted ransomware are on the rise and could be used for geopolitical and even militaristic exploitation purposes. Supply chain compromises and crypto fraud and mining will present new attack vectors for both state-sponsored and eCrime actors. Established and well-resourced cyber operations will continue to innovate, developing new methods of distributing crimeware and incorporating advanced tactics to infiltrate, disrupt and destroy systems. CrowdStrike is the only company that unifies strategic and tactical intelligence with an industry-leading managed hunting practice and unrivalled threat visibility, establishing an unprecedented view of the global threat landscape. Actionable threat intelligence and real-time threat data are crucial in empowering better security and executive decisions," said Adam Meyers, vice president of Intelligence at CrowdStrike. With the Global Threat Report, public and private sector organizations can be better informed about the employed tactics, techniques, and procedures TTPs and properly allocate the defenses and resources necessary to protect assets that are most at risk. Blurring the Lines Between Statecraft and Tradecraft here. About CrowdStrike CrowdStrike is the leader in cloud-delivered endpoint protection. Leveraging artificial intelligence AI , the CrowdStrike Falcon platform offers instant visibility and protection across the enterprise and prevents attacks on endpoints on or off the network. CrowdStrike Falcon deploys in minutes to deliver actionable intelligence and real-time protection from Day One. Its cloud infrastructure and single-agent architecture eliminate complexity and add scalability, manageability, and speed. CrowdStrike Falcon protects customers against all cyber attack types, using sophisticated signatureless AI and Indicator-of-Attack IoA based threat prevention to stop known and unknown threats in real time. Powered by the CrowdStrike Threat Graph, Falcon instantly correlates nearly billion security events a day from across the globe to immediately prevent and detect threats.
