Chapter 1 : அறிவியல் தொழில்நுட்பத்தின் நன்மைகள் மற்றும் குறைமைகள்: Tamil Wikipedia: A Case Study - அறிவியல்

The Advantages and Disadvantages of Technology There has been a significant advancement in the field of technology and science over past few decades. As in the current time people can't imagine their life without technology.

Television is a wonderful and popular invention of Science and Technology. Television plays a very important role in our daily life. It keeps us updated. Most of the people spent their free time watching television. Television is also useful for the developing country like India. Nowadays every person has access to it as everyone is keen to watch T. Merits and Demerits of Television Advantages of Television Pros of Television We come to know about current affairs, news going all around in the world. Children also get entertain by watching cartoons, stories that provide you moral values and lessons. You can also watch food recipes and try them at home. You can watch movies, listen to songs, watch daily soaps, horror series etc. We can update our self by knowing about the economy, we can also know about stock market etc. We can also watch fashion shows and come to know about the latest trends. You can watch live shows. You can also see cricket matches and can cheer up for our country. We can see the media interviews such as of political leaders, actors and actresses etc. Television is the cheap source of entertainment and now we can also subscribe the channels which we want to see. Many channels and programs provide educational information. There are various types of quiz shows which help us to gain some knowledge. We can also participate in the reality shows that could be any such as educational quiz, fear factor shows, food shows, dance shows, singing shows, and craft shows etc. Television also helps you know the places you can travel. It expands your mind. You can spend time with your family watching a movie together. The television also shows comedy shows which affect our lives in a positive manner. Television helps you to connect with people in a large number and to a diversified platform. You can now watch your favorite shows in your own language such as Tamil, Telugu, Hindi, English etc. Television also provides agricultural related information to the farmers. Television promotes national integration. Disadvantages of Television Cons of Television Disadvantages of Television If there are advantages of watching television, there are disadvantages too. Watching television in excess can affect our health that is it affects our eyes, makes lazy like couch potatoes etc. Television also makes a lot of sounds which affect our minds. Many TV shows are not suitable for innocent children. We compromise are sleep when addicted to television. We sometimes get negatively inspired by our favorite actors, actresses and role models. We may not concentrate on studies if watching too much of television. Sometimes the quality of educational programs is not good and they can provide wrong information which affects the studies of students. Reading habit of people becomes extinct. We do not spend much time with society and nature. Youth can become aggressive while watching crime related shows and act in the same manner in their real life. We spend most of our time in flipping the channels. It can also change our perception regarding the world in a negative way. Kids get attracted to the advertisements and demand the same from their parents. Addiction to television is just like an addiction to alcohol which affects us in a wrong manner. The more we watch television, the more is the electricity bill. Horror shows affect the mental state of kids and even young.

Chapter 3 : Advantages and disad - English - Tamil Translation and Examples

me keichi can you elaborate something about science advantages and disadvantages essay in tamil language sir, our professor aswal said science advantages and disadvantages essay in tamil language will describe here and anyone please add a reply for science advantages and disadvantages essay in tamil language.

Science is a way to learn how things work. Everything we do is part of science. Science is a systematic way to create knowledge and to explain materialization through objective means like observation, study and experimentation. Application of science leads to the development of technology. Technology is the skill to utilize scientific knowledge. Technology has improved our way of life in many ways. Science and technology is a term which deals with the relationship between science and technology. Advancements in science and technology like the inventions of the telephone to the internet, and from the abacus to the calculators and computers from cars to rockets and satellites. These advancements in science and technology have a great impact on the lives of people. Advantages have been in all sorts of field like medicine and communication. The advantages and disadvantages of science are listed below: Science and technology helps us to organize our daily activities. Any work can be done faster, precise and efficiently. It is easier to communicate with other people even over long distances. It helps us to understand more about us and the things and life around us. More and more species of organisms are being discovered. Vast advancements in the field of medicine have helped to lengthen our life expectancy and reduce the rate of infant mortality. Discovery of mechanizations, better techniques of agriculture has increased the food productivity level. Various means of transport like the railway, ocean liner, and jet plane and motor vehicles has made our lives comfortable. These inventions have provided great possibilities for commercial development and industrialization. Development in science and technology can be easily manipulated by irresponsible people. In the wrong hands, technology can have a negative impact on the society. Increase in rate of cyber crimes. Fail of technology may make us helpless. Science and technology is the main cause of pollution. The development of nuclear missiles through technology threatens the existence of life. Sometimes it can affect our lifestyles and health. Science is essential, and is not a new thing, it has been going on for many hundreds of years, it as just got more and more sophisticated. Advantages for science include: Helping us understand ourselves and our environment 2. Disproving myths and legends which people used to hold as the truth. Research and develop vaccinations and drugs that save peoples lives. Help us to understand the animals we live nearby so we can better understand how to protect them from threats such as deforestation and the changing environment. Helps us to perform forensics on crime scenes to help the police capture murderers, rapists and other dangerous criminals. Creates new technologies that help enrich our lives such as, the computer, the Internet, the discovery of electricity, etc 7. Science itself gives the opportunity for many people around the world to study an exciting subject giving them fulfillment and enjoyment 8. Science disciplines around the world provide jobs many many people all over the world. Best of luck on doing wonderfully in the seminar. How long should be your presentation? These are the broad points that can be covered! Defining science is a tough job, for the purpose of this presentation I will broadly classify Science into pure and applied ones. Science saves us in retail and kills us wholesale! Application of science into technology creates a lot of problems, like pollution, contamination, mass production and therefore industrialisation, then city life and so on. Science when looked from the other side, as an understanding of nature then, it is good, but, one need to exercises restraint and watch where does it limit us. Science is a study of cause and effect, we need to also look at it as, the relationship between cause and effect, is it real that there are causes ad effects, or is it a mental construct, if it is a mental construct then how do we handle this? The advantage of Science and technology is obvious. Just imagine your life without electricity! People just use technology for to do bad like making a weapons and polluting the environment. You can do bad things with just about every good thing. Hope this was helpful. Advantages- general improvements to our life such as better foods, medicines, products, and health Disadvantages- negative effects

Chapter 9 : Translate disadvantages of science essay in Tamil

Tamil Tigers of Sri Lanka. Tamil Tigers of Sri Lanka The Tamil Tigers immigrated to Sri Lanka from southern India and made up ten to fifteen percent of the population. The Tigers were the minority when compared to the Sinhalese, who represented seventy-five percent of the population.

A Case Study Tamil Wikipedia: A case study accepted for presentation at Wikimania Acknowledgment The author thanks Natkeeran , Ravishankar , Selvakumar , Karthickbala , and fellow Tamil Wikipedia editors for feedback and other inputs. Abstract Three distinct growth phases have been identified in this case study of Tamil Wikipedia since late Several distinct characteristics of the Wikipedia and its editors are identified. Outreach efforts and sibling projects are also discussed in this study. Challenges and future plans are outlined. Introduction Tamil is a classical language spoken by more than 78 million people across the world with a rich literary tradition spanning millennia. Significant acclaimed Tamil literature has existed for over two thousand years. This case study attempts to characterise the Tamil Wikipedia, its editorial team, growth trends, challenges faced, and plans to take it to the next important stage. Extant Tamil literature consists of works on poetics, philosophy, ethics, grammar, etc. Notable among the early Tamil encyclopaedias were Abidhaanakosam, [2] written by Muthuthambiyar and published in Jaffna in , and Abidhaana Chindhaamani, [3] a page work which took 42 years of determined work by Singaravelanar and published in Chennai in the year Later, a volume encyclopaedia on science and a volume work on humanities were published by the Thanjavur Tamil University, [4] in an intended series of 20 and 15 volumes respectively. The first comprehensive modern encyclopaedia was published from to as a 10 volume set. More recently, in , a collection of 28, articles from the concise edition of Encyclopaedia Britannica was translated and published in Tamil by Vikatan Publishers. Tamil Wikipedia was started on September 30, by an anonymous person by posting a link to their Yahoo! He made some anonymous edits alongside. Around five active editors including the author joined the project in the second half of Some occasional editors turned out to become regular editors and the Wiki started growing steadily. Bugs were reported to fix the interface, policies partially deriving from the English Wikipedia were initiated, and editors started to specialise in tasks like stub sorting, creating templates, copyediting, wikifying, translation, original writing etc. Even at this early stage, the Tamil Wikipedia had a global editorial team representing almost every continent. After registering a period of high linear growth in several metrics on a lower base, the Tamil Wikipedia started witnessing, around April , a low linear growth on a higher base in several quantitative metrics. This period, however, also showed a perceivably super-linear growth in article quality aspects like length, standard of prose, image use, inline citation usage, etc. Late to early was a period characterised by a near constant number of active and very active editors, a steady influx of new and occasional editors, a healthy, enthusiastic and continuity-preserving churn, and, above all, optimism for a promising future. Data up to Jan 18, articles as of April 30 Growth The three distinct phases noted in the History section are shown in the accompanying chart. The number of very active Wikipedians not in chart has also grown well. With the recent workshops and the planned events, we hope to hit a hockey-stick growth phase in the second half of The premise behind the hope is the following: Other metrics like article length etc. Given this, if the number of active users increases super-linearly due to the recent outreach efforts and the consequent mainstream media attention, content growth will really take on to a higher plane. VK , the senior most editor, has so far written articles in Mathematics, Astronomy and Philosophy, contributing from the US and India. Tamil Wikipedia has had a diverse set of editors from the beginning. The editors are from various professionsâ€”engineers, scientists, academics, students, administrators, self-employed people, etc. Editors are aged between 15 [9] and 85 years, with a non-uniform but remarkably not power law distribution in between. Educational qualifications and income levels too vary across the spectrum. Based on some available monitoring tools, it has been identified that there are approximately 60, page requests each day. However, this curve is flattening over time. A point to be kept in

mind is that many newcomers have made a significant contribution within a shorter duration than the established users. Tamil Wikipedia editors endeavour to attain currency of knowledge, by writing articles on topics that are emerging in science, technology, politics etc. As is customary, especially in agglutinative languages, suitable terminologies are coined as needed from existing words and roots. In English Wikipedia, the primary and nearly the singular motivation for editors, is to document and spread knowledge. English as a medium is incidental. However, in the case of Tamil Wikipedia, most of the editors view this as a way to spread precious knowledge in Tamil. Many editors are motivated for being able to enrich the modern Tamil corpus, by adding quality content in Tamil. One goal of the outreach programs is to make the tail long and diverse enough to make a significant contribution. But, from the beginning of , three workshops [16] were organised by Wikipedians during which the participants were introduced to the Tamil Wikipedia, explained about its philosophy and usefulness, and tutored on typing in Tamil and basic editing. Half a dozen introductory talks were delivered in meetups of other groups. These have been conducted in colleges including the prestigious Indian Institute of Science, [17] workplaces, [18] and special interest clubs. These workshops and talks have shown a good impact by way of bringing new active editors from various backgrounds. Based on the feedback from each workshop the following have been observed: Tutor-learner ratio should be around 1: Having multiple tutors handling different aspects of editing is helpful. A classroom is good, a computer science lab environment is better. Asking some uninitiated person from the audience to come forward and edit is a good approach--convinces others about ease of use, gives feedback to the tutors about difficulties faced by new editors. Articles to cite as examples should be picked based on audience composition. Emailing all those who attended, thanking them as well as inviting them to edit, leads to more conversions. In the Indian Wikipedia context, the first session after introduction should be about typing in the Indian language concerned. Following is the agenda of a typical workshop: Introductions by the host and the Tamil Wikipedia member who acted as an interface with the host A short presentation on what Wikipedia is, its history, philosophies, software, etc. The newbie picks the topic and content. However, Tamil Wiktionary is the one project that has matured and grown well. Mainly seeded by an automated bot [19] adding entries from technical dictionaries, the Tamil Wiktionary reached more than 1,00, entries and was featured on the main Wiktionary page for sometime. It has attracted more editors since then, and, at this stage, its sustenance and future growth is guaranteed. Tamil, with a long and rich literary tradition, has numerous public domain works available. Because of this, there is ample scope for Wikisource to grow. The other Tamil Wiki projects are still in bootstrapping stage and there is also some new-found interest in starting a Wikispecies project in Tamil as well.
