In a TV Guide magazine interview in the s, he said that he had grown tired of playing straight man for a hunk of wood when he was in the Army. According to Knotts, he tossed the dummy overboard off a ship in the South Pacific. He swore that he could hear the dummy calling for help as the ship sailed on, leaving him bobbing helplessly in the waves. Knotts served in the U. From October 20, through September 14, , Knotts appeared in the Broadway play version of No Time for Sergeants , in which he played two roles, listed on the playbill as a Corporal Manual Dexterity and a Preacher. In that film, Knotts reprises his Broadway role and plays a high-strung Air Force test administrator whose routine is disrupted by the hijinks of a provincial new recruit. Self-important, romantic, and nearly always wrong, Barney dreamed of the day he could use the one bullet Andy had issued to him, though he did fire his gun on a few occasions. He always fired his pistol accidentally while still in his holster or in the ceiling of the court house, at which point he would sadly hand his pistol to Andy. This is why Barney kept his one very shiny bullet in his shirt pocket. In episode , Andy gave Barney more bullets so that he would have a loaded gun to go after a bad guy that Barney unintentionally helped escape. However, it was quickly discovered that the show was funnier with the roles reversed. As Griffith maintained in several interviews, "By the second episode, I knew that Don should be funny, and I should play straight. In his autobiography, Knotts admitted that he had not yet signed a contract when Griffith announced his decision; but he had made up his mind to move on, believing he would not get the chance again. Camilla Perkins Tenant buyouts! The real estate equivalent for landlords, anyway of an M. How much would you pay to purchase an apartment that you already own? Quite a lot sometimes. In a city where development parcels are in hot demand, rent-stabilized properties are natural targets. You could always, of course, just try to harass your tenants away. And certainly some landlords do—refusing repairs, cutting utilities, violating construction codes, even, on occasion, employing physical intimidation. But aside from being unethical, immoral, and just generally the mark of a terrible human being, such practices are typically frowned upon by law enforcement and might well land you in jail. For instance, Manhattan landlord Steven Croman was this spring brought up on criminal charges after years of allegedly harassing his rent-regulated residents. Easier, then, to just pay your tenants to leave. Which brings us back to the original question—how much? That depends on a variety of factors, Wagner said. Tenants, assuming they have a strong tenancy case, hold most of the leverage in buyout situations. Is that tenant not using the premises as his or her primary residence? Have they altered the apartment illegally? Taking a project through the DHCR takes an average of around five years, Sedaghatpour said, meaning that by the time a developer receives approval, the market might have completely changed. An opposing lawyer once threatened to do so, he said, but his developer clients quickly put the kibosh on that idea and instead upped their buyout offer. The intricacies of how to handle the human aspect are often not at the forefront of their mind. The two parties agreed on a number, but Wagner and his clients wanted the deal structured such that the buyout would be taxed at the lower capital gains rate, as opposed to as conventional income. Fundamentally, he said, tenants, assuming they have a strong tenancy case, hold most of the leverage in such situations. Rather than take the offer, the tenants hired an attorney to help them negotiate. In the end, Sedaghatpour said, the buyouts will likely prove more expensive than if the developer had simply come with a reasonable offer in the first place. Sometimes staying is better anyway. Instead, he stuck it out through construction and now has a renovated building and partially renovated apartment. Even before they left, though, it felt like the neighborhood had moved on without them. The Chinese restaurant that we went to had to close. This closed, that closed. The neighborhood was changing.
