

## Chapter 1 : Used Buick Roadmaster For Sale - CarGurus

*Buick Roadmaster With Small Block Chevy Engine , How to Rebuild Your Small-Block Chevy Manual by HP Books®. Hundreds of photos, charts, and diagrams guide readers through the rebuilding process of their small-block Chevy engine.*

Its wheelbase and overall length were reduced but its weight was actually marginally increased. The sales brochure noted that VentiPorts helped ventilate the engine compartment, and possibly that was true in early , but sometime during the model year they became plugged. The idea for VentiPorts grew out of a modification Buick styling chief Ned Nickles had added to his own Roadmaster. Combined with the bombsight mascot, VentiPorts put the driver at the controls of an imaginary fighter airplane. Upon seeing this, Buick chief Harlow Curtice was so delighted that he ordered that non-lighting VentiPorts be installed on all Buicks, with the number of VentiPorts three or four corresponding to the relative displacement of the straight-eight engine installed. Dynaflo was now standard equipment, and engine horsepower was increased to through a slight increase in the compression ratio. This contributed in conjunction with the now standard Dynaflo in giving the new Buicks a top speed of mph. In the middle of the year the Riviera, joined the body style lineup selling 4, units. Featuring power windows as standard equipment, the 2-door Buick Roadmaster Riviera , along with the Cadillac Series 62 Coupe de Ville and the Oldsmobile 98 Holiday, was among the first hardtop coupes ever produced. The Riviera was also notable for its popular optional " Sweepspear " chrome body side molding, which would soon become a Buick trademark. This chrome-plated strip started above the front wheel, after which it gently curved down nearly to the rocker panel just before the rear wheel, and then curved around the rear wheel in a quarter of a circle to go straight back to the tail-light. The "Riviera trim", as it was initially called, was also made available on the Roadmaster convertible very late in the model year. With a total of 88, sold, the all-time annual record for Roadmaster, the model accounted for 27 percent of all Buick sales, a remarkably high proportion in light of its price, which was only slightly less than a Cadillac Series The restyling featured a grille so toothy that Consumer Reports commented that "a toothbrush for the dentures comes extra. Like the convertibles, the Riviera and the extra plush long wheelbase sedan came with both power windows and power seats as standard equipment. In the long wheelbase sedan was also called a Riviera although it was not a hardtop. The Sedanet and regular wheelbase sedan were cancelled. Styling changes were minimal in and Power steering was added as an option in and horsepower climbed to thanks primarily to a new four-barrel carburetor. Sales continued to slide falling to about 66, in and to 51, in By the Roadmaster straight-eight was 16 years old and had become seriously dated. Although the Nailhead as it was popularly called was nearly identical in displacement to the straight eight Fireball versus cubic inches , it was The compression ratio increased from 7. Buick also introduced a new "Twin-Turbine" Dynaflo as a companion for the V-8 engine. Estimated to increase torque at the wheels by 10 percent, the new transmission provided faster and quieter acceleration at reduced engine speeds. Both power steering and power brakes were made standard. Air conditioning was a new option and, years before many other makes, a volt electrical system was adopted. A new body style for was the Skylark convertible. The Buick Roadmaster Skylark was one of three specialty convertibles produced in by General Motors, the other two being the Oldsmobile 98 Fiesta and the Cadillac Series 62 Eldorado. Kelsey-Hayes wire wheels and a solid boot cover were standard. The following year, and for one year only, it would become its own series built on a Century body. This was the last year for the Roadmaster Estate, and it was the last wood-bodied station wagon mass-produced in the United States. Its body was a product of Ionia Manufacturing which built all Buick station wagon bodies between and Overall Roadmaster sales bounced back up to 79,
