

**Chapter 1 : Critter Commandos - Critter Commandos - Noble Knight Games**

*Critter Commandos - Core & Miscellaneous This button opens a dialog that displays additional images for this product with the option to zoom in or out. Tell us if something is incorrect.*

SciFi Rules Inventory This section of figures inventory covers all sorts of science fiction miniatures. Ultramoderns are included in the modern section. Space naval is included in naval warfare. Major supplements owned for each game are also listed. Small scale sci-fi skirmish with a rather set scope. But I actually ran a convention game with these once. Adeptus Titanicus I really loved these rules, but then again I usually love everything with giant robots. It was fun, it was fast, it was simple enough. And the model buildings gave it majestic scale. Tell me again, why did I sell off my unpainted titans? Alien Squad Leader 2. Battle Cattle Car Wars with cybernetic cows. I never played this because getting the figures proved troublesome. The system is curiously diceless, but not in any good way. Dice have simply been replaced by another much more cumbersome randomization method. And it has phased movement, another one of my all-time favorites. Instead of nice photos or art, it is largely illustrated with what appear to be concept sketches. From page 8 onwards the contents have been replaced by some sort of superhero RPG supplement. These were actually pretty fun, even though the modifiers could cap out relatively easily resulting in almost automatic hits. Interestingly the cars used common toy car scale. I made a couple of conversions. Dirtside II Sci-Fi microarmor rules. It does have a construction system, not really sure if it is balanced. Based on multiple dice types and dice shifts as modifiers. And you will either love or hate the chit damage system. It can be a bit hard to get into due to the lack of pre-generated balanced vehicles. Dust Tactics I got these as a freebie with Wargames Illustrated. But what I got was some weird boardgamey thing with square movement and no terrain in sight. Never really played them. Seem to be intended for very few figures, works on a square grid and I think it had some weird dice allocation mechanic. Gaslands I used to play Car Wars. I used to play Cars Wars a lot. The Crucible I finally got these rules and the book is absolutely fabulous. And the rules look ok too. It will be interesting to see how it all works out. Then I sold it off and now I bought this much updated version, but it still seems somewhat too complex for what I was thinking of. I really liked Lightning Strike, but this set is nowhere near as sleek. Hellfire Microscale sci-fi game. Horizon Wars Micro-sci-fi game from Osprey. Very nice looking and interesting mechanics, but unfortunately the damage mechanic kinda kills this for me. Infinity Quickstart Ok, I picked up the quickstart booklet. I guess it kinda counts. And many of the figures look like breakage waiting to happen. Laserburn And I have the Finnish language edition! Quite frankly, this is mostly interesting as sort of protoK. Never actually played it. Danger, romance and giant robots! I played these rules very extensively long long ago. Having actually destructible terrain makes these rules soooo much more fun -- we used to play with LEGO buildings. Has construction rules but it is fairly abstract. Mecha Carnage I used to buy all the giant robot rules I could lay my hands on. This actually seems to be a pretty nifty set, but in the end I never really played it. Ogre Miniatures I used to play Ogre Deluxe a lot back in high school. This is basically a hexless version of the same game. I played it a couple of times, I think it has some issues of not quite being divorced from the hexes. The weapon ranges are really really short and so are the movement distances. But then again, so they are in the board game too. Rogue Stars Heroic sci-fi skirmish or something. When I finally got it, I had almost completely forgotten about it. Still sitting in the box. I played these a couple of times. Slaughterball Futuristic American football variant. I do wonder why I bought it? Space Hulk Another classic. I loved this game until they killed it. Space Marine The original box set, the one with only marines in it. To be frank, I mostly bought this because I thought the titans needed something to stomp. Did play it back then. Space Marine 2nd edition More marines and some orks and eldar in the box. Force on Force owes quite a bit to these rules. Never really played these, because they basically offer zero help in building balanced forces.

Still in the original factory shrink wrap, with condition visible through shrink noted. For example, "SW NM " means shrink wrapped in near-mint condition. Like new with only the slightest wear, many times indistinguishable from a Mint item. Close to perfect, very collectible. Board games in this condition may be played but show little to no wear. Lightly used, but almost like new. May show very small spine creases or slight corner wear. Absolutely no tears and no marks, a collectible condition. May have medium sized creases, scuff marks, very small stain, etc. Complete and very useable. Fair Very well used, but complete and useable. May have flaws such as tears, pen marks or highlighting, large creases, stains, marks, a loose map, etc. Poor Extremely well used and has major flaws, which may be too numerous to mention. Item is complete unless noted. When only one condition is listed, then the box and contents are in the same condition. A "plus" sign indicates that an item is close to the next highest condition. A "minus" sign indicates the opposite. Boardgame counters are punched, unless noted. Due to the nature of loose counters, if a game is unplayable it may be returned for a refund of the purchase price. In most cases, boxed games and box sets do not come with dice. The cardboard backing of miniature packs is not graded. If excessively worn, they will be marked as "card worn. If excessively worn, they will be marked as "tray worn.
