I have now had this pleasure five times after the first edition of this atlas was published 34 years ago in Previous editions, as well as this edition, have benefited greatly by the many suggestions from colleagues and especially students. Students often approach this in a thoughtful subtle manner. First, the student may say how much he or she has learned from the book and give praise to the nature and color of the figures and then point out a mistaken label in one of the figures that may not have caught my eye. Of course, I am always grateful for these suggestions. In this edition, I have added many new figures—for example, 14 new figures on 5 plates dealing with the brachial plexus. At the same time, a few figures that did not prove to be excellent teaching items have been removed. Perhaps the most important change in the book is the addition of a significant number of X-rays, CT scans, and ultrasound scans. I am most grateful to Edward J. Several figures also were contributed by Dr. I have also had the pleasure of discussions with Dr. Constantine Karakousis, Professor of Surgery and Chief of Surgical Oncology at the University of Buffalo in Buffalo, New York, for the use of several of his figures and for comments on the clinical importance of several plates. Certain X-rays from Dr. There are more than plates of clinical importance in this atlas, and I have benefited greatly from my discussions and collaboration with Professor Gerald Buckberg, M. These studies have given insightful information on the manner by which the heart muscle develops and matures. Most of the figures in this atlas come from the Sobotta atlases, recent editions of which have been published by Professor R. Putz in Munich, Germany, and Professor R. Pabst in Hanover, Germany. My deepest appreciation to these two brilliant anatomists knows no bounds. Their German editions of Sobotta have been recently reproduced as the 14th English Edition in A number of drawings, some of which were also used in the 5th edition, were made by a former resident artist here at UCLA, Ms. I am most grateful for her artistic creativity. Crystal Taylor, with whom I have interacted for more than 20 years on several earlier editions of this atlas, and Ms. Julie Montalbano, the Product Manager of this edition. Here at UCLA, I am privileged to have worked with outstanding associates who form the gross anatomy faculty for both the medical and dental school at this university. These include Dr. In my 57 years of active teaching here at UCLA, collectively, these anatomists are the finest anatomy colleagues I have ever worked with. Finally, but by no means least, I must say that my wife, Julie, has been a steadfast inspiration to me and my academic life, and I am eternally grateful to her. This book is protected by copyright.
