Chapter 1 : FIDIC to issue new design, build and operate form of contract - Lexology

FIDIC Conditions of Contract for Plant And Design-Build Contract First Edition, Page 3 of the Contractor submitted with the Letter of Tender, as included in the.

Various drafts were reviewed by the following persons or organisations: FIDIC wishes to record its appreciation of the time and effort devoted by all the above. Conditions of Contract for Construction, which are recommended for building or engineering works designed by the Employer or by his representative, the Engineer. Under the usual arrangements for this type of contract, the Contractor constructs the works in accordance with a design provided by the Employer. Conditions of Contract for EPC Turnkey Projects, which are recommended where one entity takes total responsibility for the design and execution of an engineering project. Under the usual arrangements for this type of contract, the entity carries out all the Engineering, Procurement and Construction: This type of contract is usually negotiated between the parties. Short Form of Contract, which is recommended for building or engineering works of relatively small capital value. Depending on the type of work and the circumstances, this form may also be suitable for contracts of greater value, particularly for relatively simple or repetitive work or work of short duration. The forms are recommended for general use where tenders are invited on an international basis. Modifications may be required in some jurisdictions, particularly if the Conditions are to be used on domestic contracts. In the preparation of these Conditions of Contract for Plant and Design-Build, it was recognised that, while there are many sub-clauses which will be generally applicable, there are some sub-clauses which must necessarily vary to take account of the circumstances relevant to the particular contract. The sub-clauses which were considered to be applicable to many but not all contracts have been included in the General Conditions, which will facilitate their incorporation into each contract. The General Conditions and the Particular Conditions will together comprise the Conditions of Contract governing the rights and obligations of the parties. It will be necessary to prepare the Particular Conditions for each individual contract, and to take account of those sub-clauses in the General Conditions which mention the Particular Conditions. For this publication, the General Conditions were prepared on the following basis: For example, Sub-Clause This Sub-Clause becomes inapplicable even if it is not deleted if it is disregarded by not specifying the amount of the advance. It should therefore be noted that some of the provisions contained in the General Conditions may not be appropriate for an apparently-typical contract. Further information on these aspects, example wording for other arrangements, and other explanatory material and example wording to assist in the preparation of the Particular Conditions and the other tender documents, are included within this publication as Guidance for the Preparation of the Particular Conditions. Before incorporating any example wording, it must be checked to ensure that it is wholly suitable for the particular circumstances; if not, it must be amended. Where example wording is amended, and in all cases where other amendments or additions are made, care must be taken to ensure that no ambiguity is created, either with the General Conditions or between the clauses in the Particular Conditions. It is essential that all these drafting tasks, and the entire preparation of the tender documents, are entrusted to personnel with the relevant expertise, including the contractual, technical and procurement aspects. This publication concludes with example forms for the Letter of Tender, the Appendix to Tender providing a check-list of the sub-clauses which refer to it, the Contract Agreement, and alternatives for the Dispute Adjudication Agreement. This Dispute Adjudication Agreement provides text for the agreement between the Employer, the Contractor and the person appointed to act either as sole adjudicator or as a member of a three-person dispute adjudication board; and incorporates by reference the terms in the Appendix to the General Conditions. Another relevant FIDIC publication is "Tendering Procedure", which presents a systematic approach to the selection of tenderers and the obtaining and evaluation of tenders. In order to clarify the sequence of Contract activities, reference may be made to the charts on the next two pages and to the Sub-Clauses listed below some Sub-Clause numbers are also stated in the charts. The charts are illustrative
