Chapter 2 : FULTON COUNTY INDIANA

Get this from a library! Problem solving courts: a measure of justice. [JoAnn L Miller; Donald C Johnson] -- Explores a relatively new approach to criminal justice, one that can have a powerful impact on how convicts connect with their communities.

Harley Anderson ca: Built between and Pearl Mutchler later Mrs. Milton Hiland - teacher, Schuyler Grandstaff. Pearl Hiland Prairie Grove one-room school stood on the southwest corner of S and W about two miles east of Kewanna. It was across the road from the Prairie Grove Church. Lewis Starr poses by his first new car, a Ford Roadster. Buildings in background are on Main Street, Kewanna. The church was built in and the school was built in His aunt, Gertrude McLochlin, was the teacher. This was taken at Christmas. Here it is in front of the McLochlin home in Kewanna on the southeast corner of Logan and Elm streets. Gertrude McLochlin and Dorothy Smiley are posing by the door. The license is for Loyd Rouch stated that Prairie Grove School was started by her grandfather, Matthew Hale Walters, about and he taught the first year free. He taught at Dewey one-room school in Wayne Township, riding horseback to school. He quit teaching at Dewey in order to start Prairie Grove. His little daughters, Emma and Mary, would have had to go to Scotland School, and Walters considered that too far for them to walk. So he went around to the other parents and got them to donate money to start a school. He named it Prairie Grove for the grove of trees standing on the flat prairie. At first they held school in an existing building; later they built a school. The atlas does not show Prairie Grove School, but the atlas does, so this indicates it was erected between and The school stood on the southwest corner of W and S. The church at Polecat moved south a mile and a half to Prairie Grove School and then built a church across the road from the school. Polecat School closed when they built the new Jubilee School in Teachers up to were listed in Quarterly Teachers from then until Prairie Grove closed: Prairie Grove School closed in the spring of , and the pupils were bussed to Kewanna that fall. The Prairie Grove schoolhouse was sold by public auction c. He moved it a half mile south to his farm, put it up on cement blocks eight feet off the ground and used the school for a hay loft above a sheep shed. The old school was pushed off its cement block foundation by the big tornado April 3, , but it was repaired and continued in use. Kenneth Hoff, who had the old Prairie Grove school-shed torn down c. Vachel Walters, Kewanna, attended school at Prairie Grove two terms: Reed was the teacher , and Gertrude McLochlin was the teacher There was no roof on the porch at Prairie Grove by this time. Perhaps the whole school roof had leaked and been repaired and the porch roof was not deemed worth replacing so was removed. She worked for about two months selling subscriptions after school. And her brother Leo helped her by selling about a hundred subscriptions. What a happy day when she got the new car, a brand new Model A that Ford had just designed to replace the Model T. She took her pupils for rides in the rumble seat. Vachel Walters still remembers the thrilling day when the teacher won a new car! In a new high school and gymnasium was constructed in Kewanna. The building was located in the eastern side of the school yard with entrance facing east. The school yard was large, level, and covered with grass with several large trees. There was ample space for baseball games and running games. We had no playground equipment. A driven well with a hand pump stood to the south of the entrance. The usual two small buildings were near the south line of the school yard west of the school house. The building had three windows on each side north and south. There was a small entry room. Along the east wall extending from the outside wall to the entry room wall on each side of the room was a shelf about five feet from the floor. This was for our dinner pails. Below the shelf were hooks for the coats and caps, overshoes galashes were set on the floor. At the front of the room the entrance was known as the back of the room , the floor was raised about six inches for a space of about eight feet: A slate blackboard was across the front wall. There was an organ and one book case with three sections for the library books. A map rack hung above the blackboard. A large stove stood near the middle of the room with the long stove pipe extending to the chimney on the front wall west of the building. This pipe was held in place by wires attached to the ceiling. There was also a

DOWNLOAD PDF FRONT STAGE PERFORMANCES BY JERALYN FARIS, JOANN MILLER, AND THE HON. DONALD C. JOHNSON

circular lamp fixture extending from the ceiling that held four kerosene lamps. This fixture could be lowered and raised. It was seldom used during school hours but was invaluable for lighting during school functions at night, such as box socials, spelling bees and ciphering matches. On each side of the stove were two rows of seats nailed to the floor of varying sizes - the small ones at the front. The inner rows of seats were double seats. There never was any mixing of the sexes in seating in the double seats. In fact one form of discipline was to make a boy and girl share a double seat. A long recitation bench was placed just below the raised platform between the rows of seats. Pupils came to the front and sat on this bench plus any seats on the front desks as were needed for class recitation. The enrollment while I attended the school was about It varied a bit from year to year. Class size was one to five or six. For many classes a combination of grades was made such as spelling grades 4 and 5 or grades 7 and 8. It was customary every Friday to have "exercises" from the last recess to the close of school. For exercises we chose sides with every pupil being chosen. There were ciphering matches, spell downs, reading contests, charades, map locations and scrambled words. Everything had an educational basis. We had little need for physical education as we know it today. For recess-time activities we jumped the rope, had running races, jumping contests, even some marble playing. The younger girls sometimes brought their dolls and had a modified version of playing house. Among the games we played were baseball - also a midified form called "cross out," "Blackman" "dare base," "red light," and hide and go seek. There was wrestling for the boys and a bit of boxing if some boy received boxing gloves for Christmas. With the coming of snow we added the game of fox and geese. In inclement weather we often had singing, quiet games such as "fruit basket", "tic tac toe", or blackboard games. Sometimes the girls did crocheting or knitting. In addition to socializing at a box social, the profit earned was used to buy baseballs, mitts, bats, jump ropes and some library books. I shall always be grateful to Mrs. John Barnett, the Kewanna librarian, who supervised the construction of wooden boxes that would hold approximately 50 books - one for each rural school in the township. She selected the books for each box, each one being different, and had these boxes rotated each month among the schools. She did a wonderful job of selecting the books so as to include books for various grade levels and a variety of content such as fiction, science, adventure, travel, historical, and mystery. This was my doorway to the world beyond my community. In the teacher was Aileen Wittenberg. In Albert McLochlin was the teacher. In Chloe Ewing now Mrs. Alvin Johnson was teacher. Nellie Hendrickson Riemenschneider was the teacher I believe and maybe In Mildred Pownall Diveley was the teacher. She lives now in Grass Creek. McLochlin adds the following. I will try to name the families that made up the Prairie Grove district:

Chapter 3 : Times Leader - racedaydvl.com

Statistics of the probate courts of the Commonwealth of Massachusetts as reported by the registers of said courts under chapter of the Acts of and compiled by the Chief Judge of the Probate Courts.

A committee selected from the Publications Board chose some for their national recognition in their fields, some for their length of meritable sei-vice, and others for personal accomplishments. James William Batten Dr. His specific job, in his own words, was "to train the astronauts in celestial mechanics and celestial recognition. He says he joined the college faculty "because this is a good, growing institution that offers me many opportunities in both my fields. Browning Heading the largest of the seventeen departments, the School of Business, Dr. Browning has been a faculty member since Under the leadership of Dr. Browning, the School of Business has grown from a staff of two to become recognized as the largest school of its kind in North Carolina, Virginia, and West Virginia. Carter Known for his promotion of school spirit among the student body, Mr. Carter serves as Director of the Bands and as associate professor of music. Carter, a native of Mayfield, Kentucky, received his B. An active member of the North Carolina Education Association and Phi Mu Alpha, professional music frat- ernity, he, since coming to the college in , has developed the marching band into a distinctive group four times its original size. In the Spring of , the East Carolina Symphonic Band was selected, following audition, to perform at the South- eastern Division of Music Educators National Conference Convention, thus exemplify- ing the hours of patience and diligent work so unselfishly given by Mr. Davis for contributions to the field of mathematics. The Director of the Mathematics De- partment received B. Davis has written several text- books including Modern College Mnthematics and In- troductory College Mathematics, which he co-authored with W. Charles Recognized as an author, a director, an actress, and a professor, Dr. Charles joined the faculty in as a teacher in the English department and as Director of Dramatic Arts. Prior to coming to East Carolina, Dr. Charles acted on the professional stage, studied in the Theater Guild, appeared with a string quintet of the Chicago Symphony as a pianist, and acted as co-ordinator for a Columbia Broadcasting System series. Eller A professor in the science department since , Dr. Eller is known for his interest and participation as a radiation officer in Civil Defense. In this capacity, he has instructed classes in radiation monitoring. The native North Carolinian attended Columbia University where he received his doctorate. Eller, who formerly taught in public schools, is active in civic projects, the American Association for the Advancement of Science, and the Mitchell Scientific Society. He has written a "Guide to Engineering Education" and material on marine biology. Dempsey A member of the School of Business faculty. Since coming to the college in , Dr. Dempsey has served as sponsor for the local Beta Kappa chapter of Pi Omega Pi, of which she has been national president, organizer, and editor. The former Colorado public school teacher is a former corresponding secretary and president of the North Carolina chapter of Delta Kappa Gamma, society for women in education. This professor of social studies is known for his active participation in world affairs, as evidenced by his chair- manship of the World Affairs Institute held here annually and his interest in promoting the series begun on campus this year which features visiting, world-renowned lecturers. Strategy for the Future and Elements of Strategy which he co-authored. This Illinois native is a former president of the local chapter of the American Association of University Professors. Greene Born into a newspaper family. He is the author of a number of short stories and of two novels. These works have gained him national recognition as a writer of fiction. A member of Phi Beta Kappa, Mr. Pierce attended Duke University and, two years later. Harvard where his study with Pulitzer Prize winner, Robert Hillyer, increased his ambitions to become a writer. Some years ago, Mr. Pierce restored a house on his farm near Weldon, where he can be found most weekends, writing and engaging in the many interests of a land owner. Francis Speight Francis Speight, native North Carolinian, came to the college as a resident professor of art this year. The dis- tinguished artist has been described as "unexcelled among native North Carolina artists" and as having "rare genius. These dormitories include the oldest, Wilson Hall, erected in for women students,

**DOWNLOAD PDF FRONT STAGE PERFORMANCES BY JERALYN FARIS,
JOANN MILLER, AND THE HON. DONALD C. JOHNSON**

and the newest, Aycock Dormitory, completed two years ago for men students. Each of the eleven dormitories is under the supervision of a resident that resides in the dormitory for counseling purposes. Other College students either commute, live off-campus, or reside in fraternity or sorority houses.

Chapter 4 : racedaydvl.com Weekly Report - March 27

In this unique collaboration, scholar JoAnn Miller and judge Donald C. Johnson, creators of three successful problem solving courts themselves, address the compelling needs for alternatives to prisons, analyze problem solving courts in depth, and assess the impact problem solving courts can have on convicts and their communities."@en.

Greenville Experiences Beauty, Hardships of Winter "The ice was here, the ice was there, the ice was all around. Nothing was left out: The ice worked its gorgeous wonders everywhere. The students with stalled cars, no heat, no lights, and dead telephones thought the ice was beautiful too! A motorcycle left in the open catches the full fury of the storm. The ice-covered campus presents a somewhat unique and attractive view. Every bush and tree has its original design forced on it by the ice. Ralph Napp and Dr. Hans Indorf, the International Studies Abroad organization was organized to expand the number of foreign exchange students and to expand the number of American students studying or traveling abroad. Membership was not limited to foreign language students only but to any who wished to pursue a major field of study abroad. Under this program a nine-hour course was offered in the Political Science Department for studying political processes in Western Europe. East Carolina University students this year came in touch more than ever before on this campus with the international aspect of academic life. This group poses in front of a traditional Egyptian backdrop during a travel study tour to Europe and the Mediterranean. This picture of a typical tourist attraction in Pisa was taken during a tour of Southern Europe. These members of the International Studies Abroad Organization discuss future possibilities of studying abroad. The fact that the wall and its constantly changing array of characters had become a part of the University was undeniable. Many people met and became friends while taking advantage of the free "open air" atmosphere. Many made a habit of visiting the wall before or after classes. Far from being a Berlin Wall or the "good wall makes good neighbors wall" of Robert Frost, this wall was one that brought people together in common interests and goals. This student takes advantage of the wall to observe one of the coeds on campus. The wall has also become waiting place for students between classes. Mass confusion resulted as everyone pushed his way up to the counter and began shouting his order to the frantic workers. Music from the jukebox, talk of week-end plans, laughter, and friendly chatter filled the air for the congregation of friends around the tables and along the side counters. Yes, this was the soda shop scene that became so familiar to the students of East Carolina. Lunchtime in the soda shop attracts a large crowd. Parallel counters provide a place for a quiet drink and a moment of contemplation. Numerous tables and chairs in the soda shop furnish a place for rest and conversation. The main attraction in the soda shop is the usually crowded bar. Many students packed their bags and left on Friday for a two-day vacation away from dormitory life. Many who remained spent Saturday morning in bed and tried to catch up on some much-needed sleep. A few earnest students in the library caught up on some past assignments or pushed ahead in their studies. All in all, activity was relatively limited and quiet as the rise of the sun brought Saturday morning. Some people choose to spend the entire morning sleeping. Laundry, accumulated over a period of time, usually is taken out of the closet on Saturday morning. Workers clean up the last few remnants of trash thrown about during the week. The sidewalks were much too narrow as students with their opened umbrellas rushed from class to class. Occasionally an unexpected cloud spilled its contents as classes changed, and unprepared students were forced to tread unprotected in the rain. After getting settled with wet hair and drenched clothes, students often looked out the window only to find that the sun was now peeking through the clouds once again. A plastic rain hat assures this girl of protection from the elements. Rain and a small umbrella keep this couple close together. Reflections in a new-born puddle are typical of Greenville all twelve months of the year. Playing before an overflowing crowd. Ray sang a wide variety of songs including popular hits, blues, and ballads. Presenting a series of physical acrobatics, the program was divided into 14 parts and accompanied by music written by two members of the team. Highlighting the winter term was the first annual Carousel Weekend. This program began with a lecture by Al Capp, famous for creation of Li'l

Abner. James, returning to the East Carolina campus for the second straight year, performed in Minges Coliseum with a display of his hypnotic powers. Climaxing the week-end was a concert by the Lettermen on Saturday afternoon and a dance that night. The Buckingham and the Monzas provided the music. These three Chicagoans gave a two-hour performance every night for a week with a show consisting of political and sociological satire. Ray Charles performs in the first concert given in Minges Coliseum. Danish Gymnastic team demonstrates agility on the balance beam. The Lettermen in concert during Corousel weekend. Cartoonist Al Capp relates some of his opinions at the reception after his lecture. After being hypnotized by Martin St. James, a student gives his impression of Elvis Presley. If true, many marriages were put to a severe test during the flu epidemic that struck the campus. Pleas for infirmity excuses were met with the usual cooperation, and patients were whisked speedily in to see the doctors. Green and blue pills supplemented by tasty syrup were the order of the day. Fortified with renewed vigor, the students were then able to resume the never-ending struggle for knowledge and learning. A table containing assorted kinds of medicine and bandages is a familiar sight to flu victims. When attempting to kill time, students welcome magazines. A preliminary temperature check is necessary for everyone before seeing the doctor. Since each sorority had a quota of 13 pledges, competition was stiff. Skit parties at each house initiated the second phase of rush. Returning by invitation only, the sisters and rushees were able to meet and get better acquainted. After these parties, each rushee went to the Panhellenic Room to sign a preference sheet for the sorority she wished to join. Each sorority went through this same procedure; and the Panhellenic Council, with the help of Dean White, tallied the two preference sheets. Saturday the girls picked up the bids they had received and returned to their respective houses to begin the pledge period officially. Rushees sign the guest hook at the Alpha Xi Delta house. Alice and the Mad Hatter take rushees through Chi Land. Extravagant decorations highlight the skit night phase of formal rush.

Having taught archaeology at the Southern Baptist Theological Seminary, I was offered a position as associate professor of religion at WFC in the summer of , and my years there were delightful. It meant, though, that I would not be moving to Winston-Salem because I was asked to be the professor of archaeology and Ancient Near Eastern Studies in the new seminary before going to Stetson University in Florida, where I retired after 22 years. You have done me a great favor by publishing this issue. Your September issue is the best one of all. Thanks for calling it a town. During my youth I could stand in our front yard, look north, and, but for a curve in the road and a thicket, the whole town was visible. If you have a memory or brief anecdote to share, please write to Cherin C. Box , Winston-Salem, NC , or e-mail poovey wfu. Milner taught at schools in Texas and Virginia before returning to Winston-Salem four years ago. He and his students started an exchange program sev- eral years ago that has brought several stu- dents from Bosnia to the Career Center. He has gone from teaching some of the poorest students in Texas to more affluent ones in Winston-Salem, but he said both experi- ences have taught him the importance of communicating hope for the future to young people. The deadline for the awards is Dec. For information, visit www. Professor of English Andrew V. Ettin, who joined the faculty in , received the Donald O. Schoonmaker Award for Community Service. He has par- ticipated in social and religious activities as a board member of the Union of American Hebrew Congregations, as the spiritual leader of Temple Israel in Salisbury, N. Harriger, who joined the faculty in , received the Jon Reinhardt Award for Excellence in Teaching. The former stu- dents who nominated Harriger praised her for spending a great deal of time advising and working with students, especially on their writing. The Waddill Award is presented annually by the Office of Alumni Activities and the education department. Rogers, a native of Maryland, wanted to teach underprivileged children after she graduated from Wake Forest, so she ended up at P. The school had been under state review for failing to meet basic standards for 12 years, longer than any other elementary school in the state, but she and other teachers succeeded in raising test scores and getting the state review lifted. Christman, 72, counseled gen- erations of students, faculty, staff and alumni and became synonymous with University events such as Thursday morn- ing worship in Davis Chapel, the Christmas Love Feast in Wait Chapel and the annual pre-school retreat at Camp Hanes. He also began working part time as director of the Baptist Student Union. Glenn Blackburn and as assistant chaplain under L. He continued to work with the BSU but also became known for reaching out to students of other faiths. In , he secured office space in the library for part-time chap- lains from the Methodist, Presbyterian and Episcopalian churches. He became chaplain in It is a divine gift, as is the whole university. Babcock School Dean R. Charles Moyer will step down next August after five years as dean to return to full-time teaching and writing at the school. Moyer said business schools need to be re-energized with new leadership every five to eight years. News and World Report. The Angell Center for Entrepreneurship was ranked 22nd by Success magazine. The school has started three new international study programs and developed partnerships with schools in Vienna, Austria; Moscow, Russia; Lyon, France; and Stuttgart and Koblenz, Germany. He has co- authored three books and written articles for numerous professional journals. It is also the first time a team other than Maryland or North Carolina has won the champi- onship. The Demon Deacons finished the regular season as the only undefeated squad in the country with a record of Gehring, a native of Amsterdam, posted his first Wake Forest hat trick,

scoring in the 22nd, 49th and 70th minutes of the game. McEachern, the goalkeeper from Arcadia, Calif. Wake Forest went undefeated on the regular season and earned the number one seed in the ACC Tournament. For almost a quarter of a century, no Wake Forest undergraduate has received a diploma without her certification of degree requirements completion. Now, Arrington is returning to old Wake Forest. She has resigned effective this month, as senior associate registrar and registrar of the divinity school, to get married. Arrington and her new husband, who works in the area, will live with her mother, at least temporarily, in her childhood home. Arrington grew up as the only child of parents who were themselves only children. Her father taught applied math at old Wake Forest, but when the campus relocated to Winston-Salem in , he decided to remain in Wake Forest and went into the contracting business. She started out evaluating the credits of transfer students, then was put in charge of graduation and degree-requirement certification. She attributes that and many other innovations in the office over the years to her longtime boss and mentor, Margaret Perry, who served 50 years in the office, the last 25 as registrar. She was a wonderful role model. The window was small: After four years, she quit the firm and followed her heart back to English. She is a poet as well as scholar. Shockley was one of two young African-American scholars to join the English faculty last year Michael Hill, who holds a Ph. If one were to think of a pair of literary periods with essentially similar themes and styles, the British Victorian and 20th century African-American would not spring instantly to the minds of most readers. One might be even less likely to surmise that the two would comprise the specialty of one scholar. But in their use of Gothic horror conventions as metaphors for violation, evil and innocence lost, British Victorian and African-American novels have a lot in common. And in Evie Shockley, Wake Forest has a recent faculty addition who draws the connections. Shockley, in her second year at the University as an assistant professor of English, adores the novels of both traditions. Writers from these traditions were haunted by such instability. Despite being drawn to literature and writing from the time she was very young, Shockley chose to study law after college. Court of Appeals for the Sixth Circuit, Shockley went to work for the environmental law department of a large firm in Chicago. A native of Benin, he is a specialist in international development and based his book on fieldwork rather than just theory. Each summer for the past five years, he has taken a group of 10 to 12 Wake Forest students to Africa, where they hear from local experts on economic development issues and go on field trips to observe conditions for themselves. The field trips have had a humanitarian outcome as well. He and his wife, Tandeka, who is trained as a physician, have three children. Optimistic conclusions Economics professor Sylvain Boko sees hope for Africa. From a distance, Africa looms dark and chaotic, rife with poverty, disease and brutality. It can be easy to despair of a brighter future for the continent. They see, in a word, hope. Boko looks at trends in four African countries—Benin, Mali, Burkina Faso and Ghana—and comes to some optimistic conclusions. By allowing local communities to elect their own leaders and seek their own funding, he observes, the central governments of those countries are fostering conditions for economic development. The trend, he notes, continues a movement toward democratization in the nations that began in the early s. Boko sees positive signs in other, more troubled countries as well. In Angola, the death of their leader has encouraged rebels to lay down their arms. In the Congo, four neighboring countries that had been fighting for hegemony have agreed to withdraw their troops. Zimbabwe continues to spiral downward into poverty and chaos under the brutal regime of Robert Mugabe. But to Boko, these are exceptions rather than the rule. C a m p u s C h r o n i c l e D e c e m b e r 2 0 0 2 9 course of study that combines the bachelor of science in information systems with a master of science in accountancy. The information systems faculty has grown to three: McCray; Denise McManus, who specializes in telecommunications and networking; and Bruce Lewis, who concentrates on e-commerce and database systems. As a teenager in Deland, Fla. All the hours he spent making constant course corrections on his board prepared him well, it seems, for the many turns his career in business and education would take. A physics major at Wake Forest, McCray shifted directions in his first job to industrial engineering, then zig-zagged to an MBA degree and a doctorate in information systems, before doing a nifty maneuver to a faculty appointment at his alma mater. McCray will focus primarily on

A university emerged. Above: The North Carolina State Senate was the scene of much debate over the East Carolina University Bill. Left: Senators Tom White and Robert Morgan discuss the University Bill with Lt. Governor Scott.

Friends of Augusta 47 Every effort has been made to present a clear and accurate report of those who have given of themselves for the betterment of the College. Occasionally, however, mistakes and omissions occur. If you have questions regarding this report, please contact us so that we may correct our records. You may direct your questions or concerns to Karen L. Alumni Notes 25 This report reflects gifts made July 1, through June 30, Not merely because of its magnitude. But by its selfless and enlightened purpose as well. No, not by a long shot. Ten Principles The McDonnell gift of course had a context. On July 1 three years ago, we laid out a game plan for the years immediately ahead. Underlying those efforts would be certain basic principles we would follow. But if we treat them for what they might be and might become, they will become those better selves. Rather than cover that ground again here, let me give you a bit more detail on the financial picture. The Past Three Years The first order of business three years ago was to reverse decades of stagnant and declining enrollment. Under the leadership of Executive Vice President Kevin Wilson, the entering class exceeded full-time students a The other major revenue source has been gifts. In October a miracle happened: The Challenge was met on June 26, , a full year ahead of schedule! This outpouring of gifts came from caring people all over the world, including a special new friend, Doris Buffett, who was drawn especially to our Highlands Scholars. Short-term Accounts Payable are now current at 30 days. It is my own belief that all this has been possible ultimately by the Grace of God, and the boundless dedication of our trustees, faculty and staff. As a result, we have transitioned from surviving major shortfalls of the past to sustaining the present operation of the College. Looking forward, we now need to secure the future. He provideth kindnesses for many generations, and faces that he hath not seen shall bless him. You know, it takes a rather special kind of person to make a generous gift or bequest. What do they get for their money? What good can it possibly do them? Such financial backing is furnished by persons with faith and vision persons unselfish enough to plant trees whose shade they themselves will never enjoy.
