The Art of Stress-Free Productivity. But should it be? A New Practice for a New Reality The first chapter essentially states that the true art and challenge of knowledge workers is to determine what to do with ambiguous tasks and projects. Getting Control of your Life: Process what to do about them. If no, then trash it, save it, or reference it. If yes, will it take less than 2 minutes to do? If yes, then do it. If no, then delegate it or defer to doing it later put it on your calendar. If you can take an action, calendar it or write it down on a next action list. If no, trash it, write it down to do later, or save it in a reference file. Glance at your list to determine what to do and have a weekly review to gather and process everything, review your system, update your lists, get clean, clear, current, and complete. Allen highlights 3 models to decide what to do: The 4 criteria model for determining actions in the moment: The 3-fold model for evaluating daily work: The 6 level model for reviewing our own work: Getting Projects Creatively Under Way: Define purpose and principles. Setting up the Time, Space, and Tools Time: Create a block of time to get everything organized. Set up space at home, work, and in transit that are all basically identical. Allen recommends getting the following tools: Allen also recommends setting up an A-Z filing system to organize everything. Here, Allen, and his book, are showing their age a little bit. Corraling your Stuff Gather all physical things you need to process: Do a mental mindsweep of everything you need to process. This includes professional and personal commitments. Getting in to Empty After collecting everything, you need to process it. This means you should: Complete any less-than 2 minute actions. Sort into your own organizing system reminders for actions that will take more than two minutes. Identify any larger commitments, or projects, that you have. Identify things to save for later and use as reference material only. Setting up the Right Buckets Allen identifies 7 basic categories of things you have processed and will want to keep track of: Keeping your System Functional Review your calendar first, and then your action list. Making the Best Action Choices This chapter is almost a word-by-word repeat of Chapter 2, Step 5, which covers the three models to get work done. Getting Projects Under Control This chapter is a repeat of chapter 3. The Power of the Collection Habit If you feel dissatisfied with yourself, you have three options: He also says that intelligent people who over-think can benefit by intelligently dumbing themselves down with this technique. Allen argues that this technique forces: The Power of Outcome Focusing Self promotion and yada, yada, yada. The book consolidates some basic efficiency principles. I can see how students could use some of the principles to get more studying done. It helped me accomplish something I needed to do: The Bad of Getting Things Done: This means that there is pages of fluff and repetition. The Ugly of Getting Things Done: Allen is primarily a salesperson. Yes, there is wisdom in some of the time-tested methods that he has taken claim for, but he has created a cult of personality through self-promotion, common sense preaching, and a catchy book title. This church is a new age religion church that has been called a cult of personality by many, and it looks like Allen has utilized a lot of cult and ministry methods in his book to create a cult of personality amongst many knowledge workers. Final Thoughts on Getting Things Done: The book has some good content, but is vastly overrated, and the self promotion within the book is tough to take at times. Use some of the basics within it to analyze whatever workflow system you are currently looking to look for areas of improvement. The Cliff Notes should suffice. Getting Things Done Discussion: Have you read the book? What are your thoughts? What are the basics of your workflow method?

Rating Your Credit Like a Pro. Establishing or Re-Establishing Your Credit. Where to Get a Loan. Applying for Retail Financing. Applying for a Mortgage. Getting a Loan from Your House. Applying for an Auto Loan. Applying for an Educational Loan. Borrowing Through a Credit Card. Managing Your Credit Wisely. However, to completely understand credit, you need to look at credit as a way of life. Learning about credit is a journey toward building one of the most important financial tools you can use — not only to make purchases, but also to enhance your reputation and standard of living. Does it matter how you handle your credit? The manner in which you establish, develop, and maintain your credit is a direct reflection of your credibility, trustworthiness, and ability to repay your debt. It can affect your future employment and credit-seeking opportunities. Your focus is to make credit work for you, not for credit to overwhelm you in excessive debt. In this book, I share my knowledge of credit from both sides of the desk: Here you learn how to establish and properly maintain your credit. You explore the variety of avenues where credit is available: Finally, you identify the early warning signs of credit trouble, its unfortunate consequences, and how to seek counseling and fix your situation. Can you answer yes to any of these questions?
