Marin County has criminalized the installation of Smart Meters. Oh, how I wish my hubby could get a job there! Yes, modern conveniences can help with some things, but are we trading our freedom for convenience? We really need to count the cost. Fire Risk There have been hundreds of fires caused by Smart Meters. Now, how smart is that? Which begs the question "if your house causes fire due to one of these meters, will your homeowners insurance pay for it since the device is not UL certified? Legal, Constitutional and Human Rights Violations Our Constitution has been shredded recently by many government officials and courts. Should we let it go even further? So now we have utility companies forcing this technology on us that: Is a health risk 2. Is a violation of privacy 3. Is a fire hazard 4. Costs too much 5. Has no real benefit 6. This huge list of violations will really get you thinking. Exorbitant Cost Check in your area how much money your utility want to charge you for not getting a Smart Meter. Our charges in Michigan were really high and our Attorney General pressured the utilities to reduce their fees, which they did. So now the questions are: What should I do next? I have a Smart Meter already. I hope to tackle all of these questions, including: I will be adding some different options for protecting yourself from the damaging effects of EMFs. We still have some work to do but we love the protective devices from DefenderShield. More on Smart Meters:

Chapter 2 : Am I Dumb Test - Intelligence Test - How Smart Are You?

Comment: Connecting readers with great books since Used books may not include companion materials, some shelf wear, may contain highlighting/notes, may not include cdrom or access codes.

Browse by level to find great books that are just right for your emerging reader My Very First: The story begins with My Very First books! Introduce children to reading with the My Very First reading level. Books at this level feature Tug the Pup and Friends, a series written by reading specialist and international education consultant, Dr. The first step to helping children become great readers is reading aloud to them. Books at this level, like Biscuit and Pete the Cat: Too Cool for School, have short compelling stories, and are written with simple vocabulary. Repeated phrases allow young readers to read some words along with their parents. Many of the words are sight words children recognize. Active, engaging stories have appealing plots and loveable characters just for early readers. This level is just right for readers who are beginning to sound out words and sentences. Books on this level, like Danny and the Dinosaur, are written with simple sentences using familiar words. Many of the books at this level are filled with animal characters that have wonderful adventures! The vocabulary is just challenging enough to stay interesting. Children looking for favorite characters at this level will find the Berenstain Bears, Pinkalicious, and more. Level 2 is for readers who are increasingly confident, but still need some help. Books at this level, like Frog and Toad Are Friends, and Amelia Bedelia titles include more complex story lines, longer sentences, and more challenging words. Mystery and adventure stories, like Plants vs. Zombies; Save Your Brains! I Am the Flash, are included at this level, too. Level 3 includes many fun subjects kids love to read about on their own. Other themes include friendship, adventure, and science. Level 3 books are written for independent readers. They include challenging words and more complex themes and stories. Level 4 books are for children who are well on the road to becoming book lovers and are fully independent readers. This level features more historical fiction titles, like Dinosaur Hunter and First Flight, as well as books about adventure and suspense. The stories are the most advanced of all the I Can Read! How can I tell which certificate is used for what? New certificates have a certificate type code that appears after your name: Why am I getting a warning that my certificates have or will soon expire? After your smart card has been in the card reader for at least 20 seconds, the ActivClient software installed on your computer automatically checks to see if any of the certificates on your smart card are near or past their expiration date. If you have the new k PIV card , this includes the old encryption certificates that may be on your card. If the message refers only to Key Management History certificates, the user should select the Do not remind me radio button to disable future warnings regarding these old encryption certificates. Otherwise, if the message refers to 3 different types of certificates that have the same expiration date, it is time to renew your smart card certificates. How do I get rid of old certificates? When you renew your certificates you should always remove the prior ones. See instructions on how to remove old certificates. What is the PIV Users certificate? The digital certificate issued to PIV Users supports physical access. It is currently not used at NIH. E-Mail Questions I got new certificates or a new badge , how do I read my old encrypted email? Follow these key recovery instructions to obtain copies of your prior certificates, which you can then use to read old encrypted emails. When you get new certificates you will also need to reconfigure your applications to use them. Click here for more information. Click here for instructions on using your smart card with a BlackBerry. How do I configure my E-Mail client e. Click here for instructions on how to configure Applemail, Entourage or Outlook to work with your smart card. How do people send me an encrypted email? People need a copy of your email encryption digital certificate in order to send you an encrypted email. See the smart card email how-to guides for more information. When I send an encrypted email, why do I see the message Microsoft Outlook had problems encrypting this message because the following recipients had missing or invalid certificates, or conflicting or unsupported encryption capabilities? Please refer to Solving Outlook Encryption Problems for information on how to resolve this problem. First, check the instructions to make sure Outlook is properly configured. When I read an encrypted e-mail, why does Outlook say Your Digital ID name can not be found by the underlying security system? This error message is displayed when Outlook can not find the private key associated with the digital certificate used to encrypt the e-mail. First, make sure your smart card is in your smart carder when you try to read the message. It is also possible that the sender used an old certificate from their contacts list to send it to you. Have the sender get your new certificate from the GAL or send them a digitally signed email so that they can capture your new certificate to their contacts list. Then have the sender resend the encrypted e-mail to you. If you are trying to read an old email, and you have a newer smart card, you will need to recover your old smart card keys. If you previously had software certificates, you will need to contact the HHSIdentity Help Desk to recover get back your old software certificates and private keys. Up to top Smart Card Login Questions Can I use my smart card to login when my computer is not connected to the network i. Yes, but only if you had previously used your smart card to login to your computer when it was attached to the network. When you login to Active Directory, Microsoft stores caches your validated credentials on your computer; when you log in without a network connection your credentials smart card or password are compared to what is stored in your computer. This is also true if you change your password i. ActivClient software is licensed per badge. You may install it on as many computers as you need. Is ActivClient software required? Every computer needs PIV middleware to enable it to recognize and use the digital certificates on your smart card. Some operating systems have this middleware built-in e. However, even on systems that have built-in middleware, ActivClient is recommended so that you can take advantage of the additional features and functionality that it provides. Do I need the ActivClient hotfix? If your smart card is working with your computer and software, you do not need the hotfix. However, if you are having problems with your smart card the hotfix may address these issues e. You must have system administrator privileges to

DOWNLOAD PDF I AM SMART (MY FIRST READER)

install the hotfix. How do I configure ActivClient for shared computers? On shared computers, ActivClient can be configured to automatically remove your digital certificates when you remove your smart card. Click [here](#) for configuration instructions.
