Chapter 1 : Is Heathcliff a Murderer?: Great Puzzles in Nineteenth-Century Fiction by John Sutherland

Is Heathcliff a Murderer? Puzzles in Nineteenth-century Fiction, is a book of literary conundrums, ideal for brainboxes to get their teeth racedaydvl.com author, John Sutherland, is a British academic, a Professor of English literature with a distinguished record, and a yen for the Victorian age.

Great Puzzles in Nineteenth-century Fiction Readers of Victorian fiction must often have tripped up on seeming anomalies, enigmas and mysteries in their favourite novels. Does Becky kill Jos at the end of Vanity Fair? Why does one think that Hatty is pregnant in Adam Bede? How, exactly, does Victor Frankenstein make his monster? Why does Dracula come to England rather than neighbouring Germany? Why does Sherlock Holmes, of all people, get the name of his client wrong? In *Is Heathcliff a Murderer?* Applying these real world questions to fiction is not in any sense intended to catch out the novelists who are invariably cleverer than their most detectively-inclined readers. Typically, one finds a reason for the seeming anomaly. Not blunders, that is, but unexpected felicities and ingenious justifications. Puzzles in Nineteenth-century Fiction". It is another book of literary conundrums, ideal for enthusiasts of the Classics to get their teeth into. The author is a British academic, a distinguished Professor of English literature, and an author. The conundrums here all have their source in classic English novels, plus a couple of American ones, h Can Jane Eyre be Happy? The conundrums here all have their source in classic English novels, plus a couple of American ones, hence it is far more stimulating and satisfying topic for a reader who is conversant with the novels themselves. However, he writes so entertainingly that each piece could act as a trigger to read an unknown work. The premise here is that a novel should be authentic and believable; both internally consistent and also true to the times. Thirty-two novels are chosen and for all except four, there are separate essays. Two are paired in a joint piece, twice. John Sutherland carefully analyses the text, highlighting apparent inconsistencies, anachronisms and oversights. Sometimes it becomes clear though, that the author probably just forgot a minor detail. So are these all mistakes on the part of the author? Are we just trying to catch the great authors out? Well, it seems to vary. Here is one example: Mr Pickwick simply starts to conduct his "club", as a sort of hobby in late middle age, already being retired from the hurlyburly of an unspecified profession. Mr Pickwick is clearly educated and quite wealthy. We learn through events in the text that he has no knowledge of firearms, plus he is lost when confronted by lawyers, so he cannot have either been in the Army, or have had anything to do with the Law. We do not know if he inherited his money, although it is unlikely since he is "retired". Neither do we know how far his education was pursued; he never mentions any university friends or societies, nor any political affiliations. In fact he seems to have no friends outside the "club" at all. We do not know where he comes from. He has no regional accent, but does not seem to know much of London except the small area where he lives. The only things we do know, are the fact that he likes tomato sauce with his chops, that he lives in rented rooms on the third floor, and even people who have never read the book may well instantly recognise his genial, rotund, bespectacled appearance: A little bit of background knowledge helps. It was also published in serial form, with "no going back". Of course he developed it into far more and it kicked off his amazing career. For more about this see my review link here. In this case, the scenario was set up before Dickens ever came on the scene It is therefore not surprising that the details are sketchy if you will pardon the pun. John Sutherland points out another twist which had never occurred to me. He has a habit of making ridiculous claims, seeming to have done everything, everywhere. He simply has too many pasts. For others, it might prove frustrating, seem to miss the point, or be merely irrelevant. If like me you enjoy these "brainteasers", you will be pleased to hear that the author went on to write a further third one in the series. They are nice to dip into just after you have read a particular novel, although some puzzle fanatics with good memories might enjoy reading the book straight through. Here is an alphabetical list of authors, each of whom have an essay devoted to one or more of their novels in this particular volume: Jane Austen 2 R. Ballantyne included with Dickens Charlotte Bronte 2.
