

Chapter 1 : ISC Mathematics Papers Free Download Previous Years Question Papers

[Download ISC Mathematics - Solved Paper] Along with these, there are suggestions for teachers provided under every question. Students should use these suggestions as suggestions for themselves, and cover the points mentioned therein.

One among the most effective and the easiest idea than ever. Students just need to know the right method to practice the previous year papers unless they will exactly do nothing apart from wasting time. The correct strategy is very much important. For the students who want to score full marks at any cost, I will suggest that first go through Maths book. Cover the whole syllabus for a while. Once you will be done with the syllabus, start practicing the questions from previous year papers. This is what which is making you efficient to score full marks. Now, again open your Book and study the confusing section once again. Move towards the practice paper and solve it again. You will feel contented this time. The more you practice, the more you find out your doubts and more you get your doubts, the more you solve and the more you solve, the more you will get closer to your goal. No, it does not end here. Improving your weakness is the most important part in solving previous year papers. Things will get better itself. Just hit a shot and see the wonder. How to get rid of this Maths Phobia. Yes, I am gonna tell you so many ways to get rid of this strange phobia. I know, you will not accept but at one corner of your heart, you know it better that somewhere this phobia exist. We all are maths phobic. I mean, somewhere, this phobia exist in all of us. So, calm down and focus on things which are more important. Solutions for this phobia. First of all, treat Maths like you are playing a puzzle game. But, it is not impossible at all. Just give it a try. The next time, you are solving questions, just solve them like you are solving a Sudoku puzzle. Stop running away from Maths. Just face this giant monster. The more you practice, the more it will be afraid by you. And at last, you will conquer over this Phobia. Have you ever tried to study Maths just from the book? Just leave those huge bundles of refresher and help books, and get aware from the fact that most of the question papers revolves around the basic concepts of the book. It is just a myth that helps books will clear your doubts. You know what, we are not phobic of the questions in Mathematics. We fail to learn those things and get phobic ultimately. I have a solution, take a big chart paper and note down all the formulas and important concepts on it in a decorative handwriting. Just stick this chart on one of the corners of your study room. Yes, I meant it. Just read them randomly once in a day. I can bet, after days, you will thank me. If you ask me for an ideal book to practice the questions of Maths apart from book, then I will recommend, R. D Sharma and R. These two books cover almost every question which has the highest probability to come in the exam. You will get them at any nearby bookstore. No matter, how much you practice, how many books you get and how many tips you will read from here, you will not pass this test until you are not afraid of Maths while sitting in the examination hall. So, for making it better. Here, are some tips for the time, you will be appearing in the exam. First of all, make sure that Maths is not your weakness. Just give yourself a reminder every moment that you can do it. And you definitely will. I have seen so many students who get in over-confidence easily and in this hurry, they mistakenly, do the same question wrong which they have practiced of times before. From the very first moment, keep managing your time. Yes, generally, half of the question paper is left by the student and he has an excuse ready, lack of time. But, my dear buddies.
