

*Knit to Be Square: Domino Designs to Knit and Felt [Vivian Hoxbro] on racedaydvl.com *FREE* shipping on qualifying offers. Featuring small projects that are perfect for the beginning knitter, this book covers how to make modular squares that can be connected to create a variety of eye-catching designs.*

Vivian Hoxbro shows you how to combine modular squares into blocks of varying sizes that become the base for a variety of eye-catching two- and three-dimensional projects. Combine these geometric patterns with felting and you get gorgeous results! Knit to Be Square includes: Easy-to-Knit patterns for hats, bags, scarves, pillows, slippers, capelets, afghans, and more. Quick-to-knit patterns made of small squares that take relatively few stitches to finish. Ideal patterns for using up your stash. Easy washing machine felting tips for wool. An impressively sized afghan shows you how mitered squares can be used to get a patchwork effect similar to traditional quilts And more! But be prepared - this is an addictive form of knitting! One square leads to another, which leads to another, which leads to another Lots of unique pieces to knit, and all are fun, funky, and off-beat. She makes the mitered square modern and sometimes even elegant. These are not run-of-the-mill combinations. Playful, creative, and thinking outside the box. She designs for various Scandinavian yarn companies and magazines and spends her days giving workshops on knitting techniques. This two-block hat is finished in a garter stitch edging with straps that tie under the chin. A bright and cheerful bag, this bag is knitted felt and appropriate all year round. Backpack- This clever backpack is formed from two blocks that are joined along two sides to make a "pocket" at the base of the bag. Slippers- These comfy slippers, in four different variations, are adapted from traditional Faroese-Icelandic shoes. Felt the slippers in the washing machine to shrink them to size and brush on a layer of latex on the soles to give them a non-slip surface. Cape with Fringe- This airy cape is based on three-block construction with innovative shoulder shaping. Afghan- This colorful afghan, contributed by Norwegian designer Margit Henriksen, shows how easy it is to join four blocks into a large rectangle. Bucket Bag- This roomy bag is constructed like the Four-Block Cap, but in this case the initial four blocks form the bag base and the additional squares are worked around the four-block in a cup shape. This nine-panel example of twenty-nine incomplete squares has a zigzag pattern of five colors of wool. Bobble Scarf- This unusual bobble scarf is constructed much the same as the Candy Stole but with incomplete squares that are worked in panels that grow along the diagonal.

Chapter 2 : Knit To Be Square Domino Designs to Knit and Felt

Knit to Be Square includes: Easy-to-Knit patterns for hats, bags, scarves, pillows, slippers, capelets, afghans, and more Quick-to-knit patterns made of small squares that take relatively few stitches to finish.

May 13, Knit To Be Square! Download all the patterns free here! This amazing picture of all the 50 colors currently available comes from Shabby Motley Handcraft , a lovely yarn store in Sault Saint Marie, Ontario. The KAL pattern comes in 10 clues. The first 8 are sets of 6 squares 48 total , the 9th is the cabled trim and the 10th is the secret way it all gets put together. Naturally, to show off the new yarn, the original pattern uses 17 colors of the Now -- those of you who follow my projects will know that I love using color, my god do I love color! You will be interested to learn that I am using only one. Now originally I wanted to make the afghan in my favorite shade of them all, Mustard. The KAL is arranged to increase in complexity as the clues progress. BUT, I liked the floppiness of the fabric, as I like my knitted blankets to really drape over me. A lot of people are having gauge issues -- if you decrease your needle for stitch width, you will most certainly lose height. Do your best to get square unlike me , with a good hard block. You can read about how I like to block here. I always count long-tail cast-on as the first row and this time I counted it as the Right Side. I wanted the top and bottom of the squares to be perfectly symmetrical, so I actually added rows so that I could do that. I maintained this through every square. The second square was a pretty star motif also out of knit and purl. There are some gorgeous patterns out there, especially lace shawls, that cannot be written out. I like to think that a lot of people have really opened up their knitting horizons with this KAL. The third square introduced the concept of lace. I think people really enjoyed this square. It has an extra ridge of garter on the top of the bottom which is kind of odd. I find it easier, and the top stitch is tighter and looks more neat. The fourth square, released this week, is a more complicated lace motif that requires the chart most of the time. But most people thought they were wrapped bon bons! The samples in the pattern use a sl1, sl1, k1, pssso double decrease. BUT, the video on the Rowan pattern page shows a sl2tog, k1, pssso centered double decrease. Who knows what Martin Storey intended himself! I really like the samples as knitted and decided to do the twistier decrease. There are still 6 clues left AND one whole month of time to put all the finishing touches together. The shopping list and patterns can be downloaded here. To add a pin, click "Additions" and "Add Marker". To differentiate yourself from a close neighbor, put in a postal code and choose a funky symbol. I have this crazy idea to photograph the blanket in some wild way. My husband found this photo on the New York Times website

Chapter 9 : WISH LIST - Square Circle Forum

Square instructions Solid coloured and striped squares are the most fundamental part of what Knit-a-square does. It takes 35 of these squares to make a blanket and every square we receive is used, plain or patterned, knitted, crocheted or loomed.
