Add to basket Add to wishlist Description "This comprehensive and practical text provides a clear introduction to health policy analysis The book combines an overview of the theoretical base of the field with a range of real world examples drawn from different settings It is widely recognised as an essential text of international relevance, for students and practitioners alike. I highly recommend it to the new generation of activist-scholars in the field. It focuses on how health policy is made nationally and globally, clearly explaining the key concepts from political science with a wide array of engaging examples. This edition is fully updated to reflect new research and ways of thinking about the health policy process. Written by leading experts, this clear and accessible book addresses the "how" of health policy making in a range of international settings. The book provides an accessible approach to understanding: Health policy analysis Power and policy making Public and private sector Agenda setting Government roles in policy Interest groups and policy Policy implementation Globalization and policy process Policy research and evaluation Doing policy analysis Making Health Policy 2nd edition is an ideal resource for students of public health and health policy, public health practitioners and policy makers. It provides self-directed learning covering the major issues in public health affecting low, middle and high-income countries. Rosalind Plowman and Nicki Thorogood. Each chapter is structured to include Activities and Feedback, which fosters reflection and adult learning. This approach makes the book ideal for teaching at all levels of university. I highly recommend it. If anyone thinks that improving the health of a population is solely about getting the interventions and policy content right, this book will surely disavow them of that belief. Political dynamics matter, and the authors draw on the most up-to-date research to provide practitioners and students with clear, sensible, evidence-based guidance on how to manage these dynamics. It provides a unique introduction to core concepts in global health policy and brings politics to the core of public health. Why do some issues get more attention than others? Why is evidence-based policy-making so difficult? How can we understand and study power in the health system? This book provides answers to these crucial questions. The book provides an outstanding mix of policy theories, described in clear and accessible terms, with up-to-date and engaging examples from across the world that illustrate the application of those theories. Frequent activities throughout the book provide openings for greater student engagement in the subject matter. It is very clearly structured and written, and provides a wealth of concrete examples to illustrate new concepts One of the key strengths is to highlight the political nature of health policy making, not presenting it as a technocratic process, but very much part of power dynamics at the local, national and global level. This book unravels the complex world of health politics and decision-making, making it comprehensible for many who have difficulty understanding the system they work in, or aspire to enter the world of health policy to make a difference.
