

Mazda CX-5 - Navigation Manual (92 pages) Posted on 30 Jan, by TiredMemeCat. Model: Mazda CX

Until a connection has been established between the car and the Mazda NB1, the screen shows audio-related information and the NAV button on the main display is inactive. In some situations when you start the car, the navigation device may restart. If this happens, press the NAV button. A black screen is shown and it may take up to 30 seconds for the main screen to appear. Under extreme temperature conditions, the navigation device may not start. When the temperature is within the normal range again, the device should start. If the device fails to start automatically in this situation, stop your car engine and start the car engine again. In some situations, your navigation system may restart when turning your key in the ignition from ACC-ON to the engine start position. If this happens, it may take up to 30 seconds for the main screen to appear on the navigation system.

Top Setting up When you first switch on your device, you have to answer a few questions to set up the device. Answer the questions by tapping the screen. In the future, your position will be found much faster, usually within a few seconds. In areas where GPS reception is not possible, such as tunnels, your location may not be accurate. The GPS antenna is located in the dashboard so do not put objects on the dashboard.

Top Device not starting In rare cases, your TomTom navigation module may not start correctly or may stop responding to your taps. For example, if the device temperature is too high or too low, the system shuts down. In rare circumstances, you may need to reset your navigation device. To reset your device, switch off the car engine and then remove the memory card. Re-insert the memory card and switch the car engine on again.

Top Sharing information with TomTom When you first start navigating or perform a reset, your device asks for permission to collect some information about your use of the navigation device. The information is stored on the device until we retrieve it. We use it anonymously to improve our products and services. You can change whether you share this information with us at any time by doing the following: In the Main Menu, tap Settings. Tap Me and my device. Tap No to stop sharing or tap Yes to start sharing. Additional information Your navigation device will continuously collect information only if you give us your permission. The information is stored on your device until you connect it to your PC; then the information is sent to TomTom and deleted from your device. The information includes details that identify the navigation device, details about routes and locations and information entered while you were using the navigation device. Immediately after receiving this information, TomTom automatically and irreversibly destroys any information that allows identification of you or your device. These products and services are also used by government agencies and businesses. Using your navigation device, you can join the MapShare Community, or report speed cameras or danger zones. If you choose to use either of these services, your reports, that include location information and your MyTomTom account name, are sent to TomTom and kept together with your MyTomTom account. TomTom then uses your information to improve its maps and safety cameras. If you no longer allow sharing of information, none of the above information is sent to TomTom and information previously stored on your device is deleted. TomTom will not give anyone else access to the information collected from your navigation device. In choosing to provide TomTom with information you are helping to make driving better, specifically by improving maps and traffic flows and reducing congestion. We appreciate your help. If you think that your information is not being used for the purpose for which you have provided it to TomTom, contact us at <http://> See our privacy policy at <http://> Take care of your device It is important to take care of your device as follows: Your device is not designed for use in extreme temperatures and any such exposure may cause permanent damage. Do not open the casing of your device under any circumstances. Doing so may be dangerous and will void the warranty. If you sell your car, you should remove all personal information from your navigation device first. To remove your personal information, tap Settings and then tap Reset factory settings.

Top More information The website <http://> This includes information on the use of voice-recognition and on performing updates. On the website, click Navigation system owner information.
