Sounds[edit] Unlike previous versions of the operating system, Windows XP included a background song that played during the installation, the song is simply called "Windows XP Installation Music", The melody based on a song called "A Thousand Words" by Savage Garden. List of features removed in Windows XP Some of the programs and features that were part of the previous versions of Windows did not make it to Windows XP. For instance, support for TCP half-open connections was removed in Service Pack 2, [47] and the address bar on the taskbar was removed in Service Pack 3. It is based on the category of the edition grey and codebase black arrow. Windows XP was released in two major editions on launch: Home Edition and Professional Edition. Both editions were made available at retail as pre-loaded software on new computers and as boxed copies. Boxed copies were sold as "Upgrade" or "Full" licenses; the "Upgrade" versions were slightly cheaper, but require an existing version of Windows to install. The "Full" version can be installed on systems without an operating system or existing version of Windows. Home Edition is explicitly intended for consumer use and disables or removes certain advanced and enterprise-oriented features present on Professional, such as the ability to join a Windows domain , Internet Information Services , and Multilingual User Interface. The OS is primarily aimed at first-time computer owners, containing heavy localization including wallpapers and screen savers incorporating images of local landmarks , and a "My Support" area which contains video tutorials on basic computing tasks. It also removes certain "complex" features, and does not allow users to run more than three applications at a time. After a pilot program in India and Thailand , Starter was released in other emerging markets throughout Consumer interest was minuscule, with roughly 1, units shipped to OEMs , and no reported sales to consumers. Service Pack 3 is slightly different, in that it needs at least Service Pack 1 to have been installed, in order to update a live OS. It contained over minor, post-RTM bug fixes, along with all security patches released since the original release of XP. SP1 also added USB 2. This feature was added to comply with the settlement of United States v. Service Pack 2 SP2 was released on August 25, The security improvements codenamed "Springboard", [70] as these features were intended to underpin additional changes in Longhorn , included a major revision to the included firewall renamed Windows Firewall, and now enabled by default , and an update to Data Execution Prevention , which gained hardware support in the NX bit that can stop some forms of buffer overflow attacks. Raw socket support is removed which supposedly limits the damage done by zombie machines and the Windows Messenger service which had been abused to cause pop-up advertisements to be displayed as system messages without a web browser or any additional software became disabled by default. Additionally, security-related improvements were made to e-mail and web browsing. Third-party firewall and antivirus software can also be monitored from Security Center. This was done so that the browser would not violate a patent owned by Eolas. NET Framework version 1.
