

Chapter 1 : Passionate intruder | Open Library

Passionate intruder has 15 ratings and 4 reviews. Ivy said: This isn't worth wasting my time writing a proper review. All the MC's did was argue. The her.

Although a fictional book, it exposes how deception is a big factor in romantic relationships. In fact, deception is an everyday part of social life. Lilian Peake book gives a broad definition of deception might even consider wearing makeup or cosmetic image to be deception. Then at the other end of the relationship spectrum, outright falsifications have the power to be exceedingly important and can result in very serious consequences and that's why she tried her level best to lure her target. When serious deception is discovered, not only are there often severe social consequences such as termination of friendships or romantic involvements, but there can be monetary and even legal consequences. The consequences of romantic deception can range from trivial to life altering, for both the deceiver and the deceived. Peake wanted was to start over again after her previous relationship collapsed and in her fictional view, the sensational press had shredded her character to shreds, accusing her for the drowning death of her famous fiancée. It is on an isolated Scottish island Sharon thought that she could strengthen her broken spirit. It is that place where she met Calum Darwin and automatically fell in love. Chapter one Chapter two Chapter three But her side of the story could not be revealed without hurting others, and thus it must remain untold no matter what it cost her. By this point, as a reader it was clear that deception can take many forms. The omission involves intentional failure to disclose significant information. Blatant lying, or falsification, is deliberate communication of information that is known by the deceiver to be untrue. The author Lilian Peake who was born in and died in must have been taught as a child just like most people are taught that lying is wrong. However, in the context of close relationships, and in particular, within romantic relationships when honesty is often considered to be the foundation of mutual trust and satisfaction, the use of deception is remarkably common as she demonstrated in her fictional story. Especially as he persisted in believing all those lying stories about her. Moving on, the book helps explain why people constantly lie, cheat, and manipulate in relationships but that left me wondering to what effect does this have on their bond. These are the things I wanted to find out while reading this book. Many people, may not realise it, but lots of the decisions those in relationships make are based on ideas and instincts that were passed down to them from their ancestors. This was also helpful back in the days when all men needed to be big and strong to hunt to survive especially my African and Aboriginal ancestors. This shows that our evolutionary background affects the way we behave and react and in the book, it was the same view Peake held. From politicians to athletes in just ended Rio Olympics, lying is part of our human nature because most of the time the decisions we make are based on our emotions. As we get closer to another person, we both intentionally and unintentionally share with them information about who we are. While it is absolutely necessary to trust your significant other, this also lays the ground for deception. Chapter seven Chapter nine This book was published the days when mailing box was chic After all, Passion Intruder story has taught me that those who makes a better victim are those who are eager and willing to trust everything they have to be told. Anyone who has been in a relationship including myself knows that sometimes they can feel trapped. Even if it is a happy and healthy relationship, it can feel constricting to certain people. For these types of people, lying helps them relieve the stress of feeling constricted. She could have explained that she really likes this friend and she figures lying will put less of a strain on the relationship. This is a common way of people lying to spend some time doing the things that they really want to do and the things they value doing. Most people who lie do it carefully, so as not to put a large strain on their relationship. I know that honesty is the best policy in all relationships but the reality is that deception is unavoidable. It may not be the woman lying but the bloke will and if not the bloke deceiving, then the woman will. In conclusion, having read this fictional book, I was even more convinced that I should die without ever getting married no matter what. Not that am a saint, but the end result of such adventures end up in consequence. In her own views, she suggest that attitudes toward dishonesty in romantic relationships are not straightforward as the costs associated with discovery might lead one to expect. Indeed, just like Passionate Intruder author, deception in marriages, relationships is here to stay.
