Chapter 1 : Sacred Gold / Storm Silver Documentation - Sacred Gold / Storm Silver Documentation

Summary Sacred Gold and Storm Silver are the fourth set of hacks/edits I've done now; others you might be familiar with are Pokémon Fire Red Omega, Pokémon Spirit Gold, and for those of you native to GBAtemp, Pokémon Blaze Black and Volt White.

Compared to Spirit Gold, Sacred Gold and Storm Silver are full of new scripted events and other aesthetic changes to make it both full of content and a pleasure to look at. Changes to the Games While the base of the game is the same e. Legendaries are somewhat restricted, but otherwise you can build your team with pretty much anything you want. There are some minor changes in Wild encounters between Sacred Gold and Storm Silver, but all are available in both. Gym Leaders and other important trainers in particular have received a large boost to their difficulty, so get ready to take on some hard fights! A small amount of attack moves have also been edited. Edits to evolutions mean Sacred Gold and Storm Silver are self-contained i. Leafon, Glaceon, Magnetron, Nosepass On that note, some things have been changed just to make things in the game a lot more convenient. Examples include an EXP Share available in Violet City, the removal of most unnecessary Cut trees and other annoying HM moments, and the addition of buyable evolution stones to some of the shops around the regions. Coins can also now be purchased from the Goldenrod Game Corner. A wide variety of scripted events have been both added and edited. Yes, you read that right. They even have a move ordinarily learned by TM, or not at all! Some small aesthetical edits have been made, e. Some DP trainers also make an appearance, though this was a late feature and has yet to be fully fleshed out due to time constraints. Might be something to focus on in a later release. The game has had a variety of blockades added to it to increase the linearity of the story. Screenshots of the Changes Open the spoiler tag below to see a variety of screenshots from different points in the game For the Steven trainer sprite added to the game. Jhon of Romulation: For speeding quite fast through the game and informing me of bugs on the initial releases. Other tools included the ever trusty crystaltile2, some moments from Cygnus Hex Editor, and the use of programs such as Tile Molester for the one bit of sprite work I did. A strikeout example represents that the bug has been fixed and will be eliminated in the next version release. Lowers the levels a tiny bit, though Also adds Bulk Up Kingler. This changes the flag setting to ALWAYS occur, but for people who are ahead, do not wish to restart their save files and are finding themselves unable to get Surf due to a dance theater blockade, download this version and head to Olivine Pokemon Center and talk to a woman with blue hair to sort your problems out. If you are starting a New Game, then I would update to this version. If you are on 1. Additionally some small documentation changes have been added since I forgot to list a couple items. The rival coming out of the gym would initially freeze the game. Some extra bits added to to the documents. The Complete version includes every single change I have made to the game.
