

## Chapter 1 : 20 Thesis Topics for Project Management

*TROUBLED PROJECTS IN CONSTRUCTIONS DUE TO INADEQUATE RISK MANAGEMENT* By Rountos A. Euripides A THESIS REPORT Presented to the Project Management Program in the.

**Project Management Introduction** The academic discipline of project management has attracted growing interest from students, scholars and researchers in the recent times, thanks to the potential risks associated with execution of large projects. Many students and researchers ask us for suitable project management dissertation topics to improve their employment prospects. Here I have compiled a list of some project management issues for research and discussion. It should be noted that the following list is in no particular order, but modified to meet academic research requirements.

**Project Management Topics for Title: Project management as an individual academic subject** has flourished in recent decades. With it has come companies and software development firms that churn out what they consider project management tools most focused on scheduling time, cost, and team. The research will analyse different project management software in order to conclude if they do increase productivity and lead to project success. The research uses the team conflict dynamics model to analyse different conflict types and team conflict profiles to produce resolutions that can improve or lead to project success.

**Culture and Conflict Management Purpose:** The research examines how cultures of project managers may influence their methods of conflict resolution. During the Presidential Election President Donald Trump boosted about building a big, beautiful border wall across the American southern border. The research will examine if the project is possible to be completed within the 4 years of President Trumps current term and within a possible budget. Analyzing the project delay causes and how global construction companies are coping with it

**Purpose:** The main aim of the research will be focusing on identifying the main causes and symptoms of project delays and how it impacts the over project lifecycle. The second phase of the project will be focusing on how global construction companies have devised different strategies to cope with this issue. Assessing the importance of communication in maintaining quality and timely delivery of project activities. This research will be focusing on analyzing the significance of communication between project organization and its stake holders both internal and external and how this this efficient communication helps the organization in maintaining quality and timely delivery of project activities.

**Identifying the factors of project selection:** A drastic shift project benefits approach towards customer-centricity

**Purpose:** The main purpose of this research paper is to identify the most important factors that helps in selecting a project. This paper will specifically be focusing on analyze the shift of project benefits approach towards customer-centricity. Project benefits are focused more on attaining tangible things such as high sales, more revenue, faster call handling times etc; whereas customer centricity approach is focused more on selecting those clients who are easy to work with, having high brand value etc.

**Analyzing the impact of project misalignment with business objectives on the overall project performance:** Although there are many factors that causes projects delays or makes it unsuccessful, however this research will be focusing on identifying the consequences of project misalignment with business objectives on the overall project performance. Assessing the importance of project management soft skills in the context of project success rates

**Purpose:** This research will be having a detailed critical analysis of project management soft skills including its benefits and cost and how it helps the project in achieving the desired result and outcome. If so, presumably the originators faced the same challenges of legitimacy as project management research faces to day. In which case, what can be learned from the original emergence and growth of general management?

**The role of users and tutors** To identify and discuss the differences between project management and operations management

**What is the most suitable time to develop project plan and how detailed it should be?** To establish the first principles of project management for project community

**Also Read:** Learn more about Research Prospect dissertation writing services.

**Time Estimation** Forecasting project progress and early warning of project overruns with probabilistic methods

**Developing a model for successful estimation of Times and Cost** Quality Management To examine the current quality management theories and practices in UK

**Quality Control and Due Diligence in Project Management: Challenges and Changes** A Strategic HRM and Project Management in an Abu Dhabi Governmental
