

## Chapter 1 : Jack Schwager | A Real Market Wizard

*With The Wizard, there's no guessing. Ever. We provide exact buy and sell signals, trailing stops and profit targets - right down to the penny. And we do it for both long and short trades. On over 10, stocks, ETF's, futures contracts and forex pairs.*

Fees depend on location and length of presentation. Further information is available by contacting Jack Schwager at jack jackschwager. Talks can be tailored to any desired length, although minutes is usually optimal. Multiple talks can be combined with breaks as part of a half-day or full-day workshop. A sample of talk topics is provided below. The first two talks are the most popular and work well for both professional and layman audiences. Other topics are possible as well. Talks and workshops are designed to fit client needs.

**Common Denominators of the Market Wizards** This talk seeks to answer the question: What traits set apart those individuals who have achieved extraordinary success in the markets from everyone else? The talk is heavily anecdotal, based on the interviews conducted in the Market Wizards book series.

**Hedge Fund Market Wizard Lessons** This talk is similar to Talk 1 with the essential difference being that it focuses specifically on the personalities and lessons of the traders profiled in Hedge Fund Market Wizards, the newest book in series.

It is very well suited for audiences that might contain a meaningful percentage of people who previously heard Talk 1.

**Market Wizards Workshop Parts** This 3-part workshop includes all the material in Talks 1 and 2 above in addition to the equivalent of a third talk with new material not contained in either Talks 1 and 2.

**Investment Fallacies Parts 1 and 2** These talks focus on a variety of investing misconceptions.

**A Practical Guide to Performance Measurement and Risk Management** A focused talk intended for audiences with a specific interest in performance measurement and risk management.

**Testing and Evaluating Trading Systems** A focused talk intended for traders with interest in trading system testing design and evaluation. Best suited as a topic in a workshop presentation rather than as single talk.

**Understanding Hedge Funds** This talk would be good overview for an audience with little or no knowledge in hedge funds, but a desire to learn the basics about this investment class. Can be an individual talk or part of workshop. Other time priorities, however, changed this expectation. I do not anticipate adding posts in the foreseeable future. I will leave the posts I originally provided in place. These posts relate to trades that motivated me sufficiently to write a comment to reinforce market lessons. They are notes that I wrote to myself. But I believe that most traders will find at least some of these comments helpful and quite possibly personally pertinent. Unless otherwise noted the charts were generated on the Thinkorswim platform on Ameritrade.

*In his book, Stock Trading Wizard, Tony Oz discloses his short-term trading strategies in a simple yet comprehensive manner. The book goes straight to the point covering all the essential elements for short-term trading. It was designed by the author for everyone who is serious about trading stocks for a living.*

Is someone you know showing symptoms of TV-Zombie Syndrome? Subscribe to RightLine I wonder what would happen if we took just a tenth of those hours - the equivalent of four hour work-weeks - to work on our stock trading skills? Should you decide to follow such a "radical" strategy, here is a simple guide to help you along the pathway to trader enlightenment Include the details of how you. Write down everything that might go wrong when you are trading. Then list the action you will take in response to each unexpected event. Review the Drill until you are sure that you know exactly what to do in each instance. Now, develop a plan of action to eliminate it. Once you are reasonably comfortable that you have it under control, move on to the next one. Be patient with yourself - this important process takes time. As you mature you will acquire new skills and widen your range of positive qualities. Make a permanent commitment to improvement. No matter what happens, YOU are responsible - no exceptions. If your Internet connection goes down, or you lose electrical power, or your broker heads to Tijuana with your trading account, you still accept that you play a role in all situations. Blame no one, simply work toward a solution. Most traders are in self-denial about their actions. By taking full responsibility, you will quickly recognize and correct any hidden problems emanating from you. Depending on the time frame you usually trade, your wrap-up routine can be done daily or weekly, perhaps even monthly. At the end of each trading period, take a few moments to analyze your feelings. Did you stick with your plan? The more you become aware of how you feel, the less negative impact your feelings will have on your performance. Review your trading performance at least once a month. Do the same with your losers to find the "Loss" side of the ratio. Also tally your trading commissions and other brokerage fees to determine how much it costs you to trade. Once you know your results, you can conclude how well your methods are working, and adjust your trading rule to improve performance if needed.

### Chapter 3 : Stock Trading Wizard : Advanced Short-Term Trading Strategies for Swing and Day Trading by

*In his book, Stock Trading Wizard, Tony Oz discloses his short-term trading strategies in a simple yet comprehensive manner. The book goes straight to the point covering all the essential elements for short-term trading.*

Online trading has inherent risk due to system response and access times that may vary due to market conditions, system performance, and other factors. An investor should understand these and additional risks before trading. Carefully consider the investment objectives, risks, charges and expenses before investing. All investments involve risk and losses may exceed the principal invested. Past performance of a security, industry, sector, market, or financial product does not guarantee future results or returns. Firstrade is a discount broker that provides self-directed investors with brokerage services, and does not make recommendations or offer investment, financial, legal or tax advice. Options trading involves risk and is not suitable for all investors. Options trading privileges are subject to Firstrade review and approval. Please review the Characteristics and Risks of Standardized Options brochure before you begin trading options. ETF trading involves risks. Please read the prospectus carefully before investing. Leveraged and Inverse ETFs may not be suitable for long-term investors and may increase exposure to volatility through the use of leverage, short sales of securities, derivatives and other complex investment strategies. ETF Information and Disclosure. Investors should consider the investment objectives, risks, and charges and expenses of a mutual fund or ETF carefully before investing. A mutual fund or ETF prospectus contains this and other information and can be obtained by emailing service@firstrade.com. Margin trading involves interest charges and risks, including the potential to lose more than deposited or the need to deposit additional collateral in a falling market. The Margin Disclosure Statement and Agreement PDF is available for download, and contains information on our lending policies, interest charges, and the risks associated with margin accounts. See our Pricing page for detailed pricing of all security types offered at Firstrade. All prices listed are subject to change without notice. Any specific securities, or types of securities, used as examples are for demonstration purposes only. None of the information provided should be considered a recommendation or solicitation to invest in, or liquidate, a particular security or type of security. This is not an offer or solicitation in any jurisdiction where Firstrade is not authorized to conduct securities transaction. System response and access times may vary due to market conditions, system performance, and other factors.

## Chapter 4 : Online Stock Trading - From TV Zombie To Stock Trading Wizard

*Financial Markets Wizard Member - C.P. Noshee Khan is an absolute wizard when it comes to stock trading. He takes a newbie trader like me and shows me what a Break Out and Break Out Reversal strategies are. Noshee literally took me by the hand and made internet trading comfortable.*

One of the greatest traders of our time: A history lesson about a stock trading idea-for the newbies and not only! Nicholas Darvas was a brilliant investor, and one of the first traders to use technical analysis. Before Darvas came to America he studied economics at the University of Budapest. In , he immigrated to the United States, where he trained with his half-sister, Julia, to be a ballroom dancer. And he was a very good dancer, touring the world by He started investing in , a ballroom dancer who had never invested in the stock market. Two months later, the stock tripled and Darvas made a tidy profit. An investor was born. Like anyone beginning to trade on the stock market, Darvas made his mistakes. When he started out, many of his trades were gambles. He would pick companies that were the next big thing, or that came recommended by other traders. Many of his first large trades resulted in a huge losses. But cheered on by whatever small profits he did make, Darvas began asking questions about why stocks behaved the way they did. He began devouring newsletters, books, tip sheets, "hot tips", and so-called insider information, in his quest to understand the market. Yet, despite his arsenal of knowledge, Darvas continued to lose money. In , he purchased over fifty thousand dollars worth of a company called Jones and Laughlin. Jones and Laughlin had an excellent price to earnings ratio, high dividends, and was in a strong industry group. He was so confident in his analysis, that he bought most of this stock on margin. Then Jones and Laughlin began to fall. In a desperate attempt to recoup his losses Darvas bought a stock he knew virtually nothing about. Soon it had risen to a point where he regained about half of his losses. At this point in his career, Darvas was frustrated with his attempts at analyzing stocks. With Jones and Laughlin, he had put a value on the stock and expected the price of the stock to behave as he expected. Annoyed with information from tip sheets, friends, so called experts, and even Wall Street maxims, he decided to shun most of these common sources. In Darvas embarked on a two-year tour of the world to showcase his ballroom dancing. During this time he developed his famed Darvas Box method of screening stocks. Wanting to keep up on his holdings in stock he already owned and always on the lookout for new stocks, Darvas looked for ways to get American stock quotes while he traveled. After Darvas returned to New York, people who were amazed with his success began to give him "hot tips" and stock advice again. Darvas listened to them, and took huge losses on the fortune he had made. Realizing that it was the human element in stock trading that was his downfall, Darvas sequestered himself in Paris in February of Using very little data, and a lot of intelligence and discipline, Darvas refined his Box method of picking stocks. Within six months, he had turned a profit of two million dollars. Nicholas Darvas is regarded as one of the best traders in the history of the market. Darvas Boxes are used today and are the subject of analysis for financial researchers. Many software firms are developing programs that make the exact same observations and decisions that Darvas made as he watched stock prices and volume. His method is complicated and difficult to master, but it has been rigorously tested by those in the business and has been found to be one of the best methods out there. Although our Stock Trading System does not use his method in selecting stocks, we recommend studying his method as a pure technical strategy.

## Chapter 5 : How it Works | The Wizard

*63 Mark Minervini This Is How a Stock Market Wizard Trades Minervini began trading stocks in and faced a number of years of losses. His breakthrough came when he read Richard.*

Wake up to Profits? The 3 most important techniques How to Trade Gaps. How to Trade Opening Range Breakout. How to Trade Breakouts. Come join thousands of traders and finally discover how to master stock trading. Learn the secrets to become independent and profitable trader and enjoy the freedom you so richly deserve. Working as IT consultant: Dealing with the early morning commute: Constantly reporting to my boss: Feeling as if the daily routine was sucking the life out of my body: To provide some background, I worked at an IT consulting job. So I was doing the typical consulting work routine. It was a stressing and unhealthy lifestyle. Then I would crawl into bed without spending time with my new wife. It definitely was a trying lifestyle. I reached my breaking point in March of , when I was told I was being laid off. At that moment, everything in my life came to a screeching halt. I had no money coming in, but still had two mortgages and credit card debts totaling about one million dollars on my shoulders. Yet getting back into the proverbial rat race was disheartening. I could find another consulting job where I would just become miserable again and not spend any time with my wife. And then, what about the future when kids became a part of our lives? I would miss seeing them off from school or picking them up in the afternoons. They would grow up never really knowing who the man was that would rush out the door in the mornings and what part he had in their lives. I wanted to provide my wife with a happy life and provide my future children with the Dad that they deserved to know. I wanted to feel the inner satisfaction of helping others while being my own boss. I wanted to enjoy everything that I had missed out on before, such as traveling around the world and working at any location while choosing the hours I wanted to put in at the job. While I had that constant fear about debt completely wrecking my life and possibly my marriage, I did the only thing that I could do. I evicted myself from the misery. I shut down the recruiters trying to get me involved in various projects across the country and overseas. I burned that past bridge down. So I went to snipping down my monthly budget. Every unnecessary expense had to go as I focused on what was necessary for our lives. There was just so much information to absorb. Luckily, with the trading knowledge that I acquired part-time, while working as IT consultant, I started my journey at full steam. I also lucked out and had some wonderful people, my guiding angels, provide me with mentor-ship that allowed me to go down the right track. I read all the online literature I could find about stocks and options trading. I soaked in the knowledge from books as my angels admired my passion and talent for the trade. I held my own as a stocks and options trader, and then began to exceed even my own expectations. I became debt free. My wife and I now owned homes in several countries. I could trade from anywhere in the world as I enjoyed the creature comforts of outdoor activities. I can play on sandy beaches in the summer and go kayaking, zip lining and bungee jumping in the mountains. I even had the opportunity to go on exciting elephant rides in foreign countries during the day after putting in some hours on the stock market. It was a dream come true. At one time in my trading life, I had other traders come to me seeking help. After receiving such excellent mentor-ship, I paid it forward and offered advice so they could create their own fortunes through stock market advisory services and coaching programs. Yet as I further honed the techniques and knowledge about the stock market, I started to notice an interesting pattern. Most of my time was being spent learning every possible technique out there, which forced me to expend too much time and energy trying to mesh all of the different techniques together. Instead, I could reach further success by changing my focus and concentrating on truly mastering just a few techniques that most professional traders use to reach financial success. Through this new stocks and options trading strategy, I saw enormous gains at a rapid pace and my portfolio grew at light speed. I was absolutely shocked. While I had mastered several chart patterns and trading techniques, there were three specific techniques that continually proved highly profitable to me. And now I want to share these three techniques with you for free. I want you to break out of the corporate cubicle wars and instead reach the same financial success with stock market trading. No longer worry about the debt you have over your head. Spend more time with the family and pursue all the luxuries that life has to offer. In

my "Mastering the Stock Market" guide book, I go into greater detail about these three simple trading techniques and how mastering these will make you into an independent and profitable trader. Finally burn the bridges that are holding you back from financial freedom and happiness. Before I met Noshee I thought that stock trading was too time-consuming and only for the experts who had the time to study every business being traded. While no one can control the swings in the markets, Noshee has spent the time and effort to perfect a system to make trading much easier to understand and implement. He has developed proven strategies such as "break out reversal" and "automatic triggers" designed to teach you to maximize the upside and even make money on the downside. Noshee Khan is an absolute wizard when it comes to stock trading. He takes a newbie trader like me and shows me what a Break Out and Break Out Reversal strategies are. Noshee literally took me by the hand and made internet trading comfortable. Noshee, this guide was so helpful to me! Thank you for your strategy call! Thank you so much for your professionalism and your expert knowledge. Knowing Noshee as I do, in addition to the technical knowledge he possesses, he has a depth of character and intellect that will quickly help you see you have chosen the right advisor for your investment needs. Noshee Khan is the real deal. He is so on top of the market with his trading techniques that are duplicatable that anyone can learn. I truly have a different new positive attitude about Stock Trading and it working for me. Financial Markets Wizard gives out profitable trade ideas every day. If you want no-nonsense precision guided advice and real world practical ideas that you can execute today you will love their trading process. Ask him about the Break Out and Reversal trading strategies. I appreciate The quality content Noshee shares with each new client to make sure they have complete clarity of his system. My husband and I are happy to have him consult with us about trading and all our fears to move forward were removed.
