I bought this book on Whispersync and read it in both formats. Frankly I found Mr. Making the author of the book who was also the prosecutor in the case sound like Casper the Friendly Ghost was I thought way over the top. I had to go back to the Kindle version to determine what was going on. What was the most compelling aspect of this narrative? I live locally to the areas mentioned and was completely caught up in the theory that Lenny Paradiso was a serial killer. I accepted it pretty quickly because of the narrative descriptions of the crimes. I guess there is not much doubt that Paradiso raped Connie Porter. There is a great deal of question however on the streets of Boston about his being the perpetrator in the Iannuzzi homicide and there is no proof or probability that he had anything to do with the disappearance of Joan Webster. Burke, knowingly or not, was engaged in a cover-up regarding what really happened to Joan Webster. No one I talked to thinks Lenny Paradiso is a "good guy. There are a lot of Bostonians completely dissatisfied with Mr. As I said, Mr. I found these voices in a very serious crime analysis distracting. This is a chilling book. Was this a book you wanted to listen to all in one sitting? I finished it in less than two days. What could have made this a 4 or 5-star listening experience for you? I could not get passed the first 45 minutes in which the narrator not only poorly attempts a Boston accent but I think he is trying to do some old gangster movie type acting and it is AWFUL! When he got to the point of trying to do a voice for a black pimp from the early 70s I just got embarrassed for him and quit. Would you ever listen to anything by Timothy M. Maybe but must have a different reader. How did the narrator detract from the book? I would from Timothy Burke. The story was good and out together in a good order How could the performance have been better? Picked anyone else who has narrated something besides a text book before. His inflections to different people was horrid!
