Jun 02, Penny rated it really liked it This is not the edition that I read, but this first edition is not listed. I had to request this book through an interlibrary loan. This particular issue was copyright ,an original, Library of Congress Catalog Card Number I had become interested in the author because he wrote the novel that eventually became the movie Jeremiah Johnson. It is Little House 2. The winters are grueling and provisioning food and heat are more than difficult -- truly life and death situations. It is about overcoming, and it is about learning about life. The world is at once close about him and remote as the stars; it is friendly and intimate, and hopelessly baffling. Without knowing geology, I sensed geologic time. I touched the beat of the big rhythm, the coming and going of oceans and the rise and fall of mountains Time was indeed a strange thing. The time of the ant, the time of the tumble bug, the time of the prairie dog, and the time of a boy. I am quoting from the original book jacket about Hal Borland: He has written several documentary movies, two volumes of poetry, a volume of essays, has collaborated on a play, and has contributed many non-fiction articles, short stories and novelettes to leading magazines here and abroad. Borland was graduated from the Columbia School of Journalism. He also attended the University of Colorado and received a Litt. Hal worked with his father to build a house and dig a well, and then his mother joined them. Life is not easy over the next 3 years, having to deal with the weather, livestock losses, and health problems. Hal grows up doing chores around the farm but enjoys the homesteading life as well. I really enjoyed this book, and I did not realize b Beautifully written memoir of the years Hal Borland and his family spent on the Colorado Frontier when his father decided he wanted to try homesteading in I really enjoyed this book, and I did not realize before I read this how "wild" some parts of the "Wild West" actually were even at the turn of the century. There were still a lot of risks living out on the Plains then. This is a book I will remember forever. One moment that really stood out for me was when Hal and his father are heading to the homestead with the load of lumber to build the house.

High, Wide and Lonesome: Growing Up on the Colorado Frontier by Hal Borland In this memoir of a lost America, Hal Borland tells the story of his family's migration to eastern Colorado as homesteaders at the turn of the twentieth century.

This is part of a monthly series of stories by the Community History Writers, a group of area individuals committed to documenting and writing about local history and the people, places and happenings that created the various communities within Morgan County. This volunteer group first came together to create, "Morgan County: Dick is pictured at age 6 when he had dreams of becoming a cowboy, according to an interview he gave as an adult speaking about this picture. Fort Morgan has "exported" people who are successful in the fields of medicine, space, technology, education, finance, law, agriculture and the arts. Philip wrote at least 33 novels and short stories, most of which have been translated into 25 languages. He renewed his friendship with Dorothy, and they married in After attending Georgetown University, Edgar worked for the Department of Agriculture, and the couple moved to Chicago for his work. Philip and his twin sister, Jane, were born six weeks prematurely at home in Chicago in December of A visiting nurse sent both Philip and Jane to the hospital on Jan. In the hospital, Philip was put in an incubator and was given special formula until he weighed 5 pounds. The loss of his sister had a great effect on the themes and plots of his literary work. Several of his novels featured twins, dystopian plots and a dark view of people. Philip lived in California for the rest of his life, but his body later was returned to Riverside Cemetery to lie next to his baby sister. Fans have come on pilgrimage to his grave. They have left flowers, cards, letters, notes, copies of his books, small sheep figurines, packages of cigarettes and small liquor bottles – some filled, some empty. Michener, who grew up in Pennsylvania, came to Greeley in as a successful college professor, though he was only 29 years old. For three years, he was the director of social studies at Colorado State College of Education now University of Northern Colorado , and he fell in love with the vastness of the prairie horizon and its seemingly endless sky. James said that the landscape gave him the "freedom to think that resulted in three of the most determining years" of his life. He loved the West and mentioned Colorado often in his earliest novels. The character is enthusiastic about the "grandeur of the limitless plains. This enormous epic novel, which covered years of settlement in Colorado, was an immediate critical and popular success after its publication. Many of the locations featured in the miniseries are in northeastern Colorado, including: These all created an authentic background for the drama. Filming began in our area in March of ; Hollywood workmen, whose creative talents turned Orchard into Centennial, lived at the Wayward Wind Motel before and during the filming. While staying there, they provided exciting insights into the process of making movies. One day the Morgan County sheriff was called to the set at Orchard to discourage Prairie School students who had come to see the filming. Being able to visit with the cast members added to the feeling that our area was special. The mini-series was an astonishing success, not only in America but in many other countries. One Fort Morgan preteen was chosen as a pen pal by a British girl, who asked to be told all the details of "Centennial" because her family so loved the series. Morgan Community College, which was a fledgling community college in that time period, offered Elderhostel classes for several years, which were quite popular. UNC offered "real" "Centennial" geography classes, which also were popular. Both his parents, Jack and Sula Crichton, grew up here. They were high school sweethearts and graduated from FMHS. His widowed paternal grandmother, Mrs. At age 2, Michael was operated on by Dr. In the fall, his mother took

him to the pond in Riverside Park, which then served as the swimming pool. Sitting on the diving board, she would give him stones to throw, one at a time, into the water, watching the circles rippling in the water. In a few weeks, he stopped stuttering. Jack Crichton then moved the family to New York City, where he returned to his prewar career of writing advertising copy. These were character traits he used when he would write a paperback "thriller" a week while studying at Harvard Medical School. Several FMHS students and other community residents were extras in the film, and a few area folks even had small speaking parts. After the film was shown in theaters, there were people who visited Fort Morgan to tour the sites they had seen in the movie. Far-reaching influence The Fort Morgan community may be best known for nurturing the talents of Glenn Miller, but it also played small, but significant roles in influencing many other aspects of popular entertainment. Part of the movie "Dumb and Dumber" was filmed in Fort Morgan.
