These buttons will only work if you have JavaScript and Cookies enabled on your browser: For reasons of both legality and musical quality we do not recommend that you should attempt to obtain any illegal books, nor do we know where you could get them from anyway. Their indexes are included here as they may be helpful to these people. Please do not ask us about obtaining them as you will not get any reply. Also if you want to buy a new fakebook, it might help you to decide which one you want. This page does not yet have sponsors in other territories. We have no information about obtaining any illegal publications, nor do we recommend you to try to obtain such things. Search Tips You should type one or more words or partial words separated by spaces, in the text field alongside the "Search" button. If you give a very short search string such as "a" or "love" then this will match too many titles for the search to be useful. In this case you will get a message suggesting that you should be a bit more specific. If the title you are looking for is actually several words long then the best way to be more specific is to add some more words or partial words to your search. Alternatively if the title is short you could specify that only short titles should be matched, by making a selection in the "Match titles of length" selection list, or you could specify "Match whole words only" which means that "love" will not match a title with the word "lover" in it. Normally, the matching of partial words is useful: Accented characters appear as their unaccented equivalents i. French "e-acute" becomes plain "e". Paired quotation marks always use double-blip quotes Take the "A" Train. By an amazing coincidence it just so happens that that we Seventh String Software have written a program specifically to help with this task. Click here for information about Transcribe! If the book you have in mind is relevant to jazz musicians then we might very well be happy to add it to this index. Note, however, that we do not plan to add any more illegal books as there are so many good legal books these days.
