Paper, large piece for work surface Tape 3 tin cans, in descending sizes Craft foam shapes, geometric shapes Scissors Craft foam: Empty cans of contents. Make sure there are no sharp edges. Wash and dry cans. Place large piece of paper on work surface to catch excess glitter so it can be returned to container and used again. With bottom of can up, apply glue using brush in bottle of Tacky Glue Brush-On. Repeat for all cans. Click on Printables for Patterns. Referring to photo, tape patterns to desired color of craft foam and cut out. Cut craft foam geometric shapes into other shapes to make eyes, mouths and other areas. We cut larger hearts into ovals and triangles. Glue faces on cans. If two pieces are to be glued together, squeeze FunCraft Foam Glue onto one piece and wait for it to dry before putting them together. On faces, squeeze out dots, lines and outlines with Gellies. Sprinkle with same glitter that is on can. Let dry a few moments and tap off excess. Apply FunCraft Foam Glue to edges of pieces that will attach to can. Let glue dry and attach to cans. Make sure embellished face pieces are dry. Refer to photo for placement. Apply a small amount of Brush-On glue around bottom and top of two cans and stack. Patterns, Templates and Printables Click on a pattern to open it in a new window Contributor Where you can explore and share, crafters can play and artists can grow!

Chapter 2 : Totem Pole Craft - No Time For Flash Cards

*Totem Poles to Color & Cut Out: Tlingit [Stephen Brown] on racedaydvl.com *FREE* shipping on qualifying offers. Here are the most glorious masterpieces of Alaska's Tlingit carvers to cut out and put together.*

One sight words pdf from the link above for each small group laminate the cards for durability , and scissors. If the children wish to color the turkeys, have them color before laminating clear contact paper will work for laminating if you do not have access to supplies. Print the sight words on heavy paper and laminate. Have the children cut out each of the turkeys assist younger children with scissors skills. To play the game: If the word is read correctly or the beginning letter identified , the child keeps the card. There are blank box turkeys for any additional sight words your children may be working on. The children can then use turkeys as homemade rubbing plates. To make the Pilgrims cut each of the black pieces apart. Follow the photo for proper placement and tape the ends together in back of the cardboard tube. Older children can cut the black pieces apart, but younger children will need assistance. It helps to print the picture and display before starting the project. The children can color the buckles or face as they wish. The kids loved putting the Pilgrims in the boats, playing with them on the floor or tables, and making up Thanksgiving stories to retell with their pilgrims. Copies of the Totem Pole Designs. Print copies of the totem pole designs and have the children color. Tape the designs on empty formula or coffee cans and stack on top of each other. We know that he visited Cahokia Mounds in Illinois several times. The mounds in Illinois show settlement and farming as early as B. I have searched for the origins as they are intricate enough to possibly belong to specific tribe s. If any of you have information regarding the origin of the design, please leave a comment below and let us know!

Chapter 3 : Tiki Totem Jointed Cutout

Chapter 4 : Totem Pole Character Crafts for Children

Cardboard tubes from toilet paper rolls, paper towels, aluminum foil, saran wrap, etc., make great bases for children to create paper totem poles. Children can cut out and color the totem pole creatures then paste or tape them onto the tubes.

By Robert De Groat Color Detail of Totem Three crouching human figures with headds, part human, form the principle design of the wolf head totem, left. The lower one has a broad nose, projecting front teeth, and animal ears. The principle figure has upon its head one of those cylindrical objects of a blue color which are placed on dance hats, and against this leans the next figure, whose feet cannot be seen. It has a hooked nose turning into the mouth, and the ears of an animal. In all three figures, arms, legs, mouth, face, nostrils, and ear-holes are scarlet. Eyebrows, eyeballs and edges of ears are black. This color is used, along with other light colors, as a background and predominating shade. As a rule it symbolized the skies and spacious heavens. It also stood for purity, peace, and death. Generally this color stands for blood, war or valor. Sometimes it is used as appears in nature, such as the crest of a red-headed woodpecker, the scarlet tanager or frequently the tongue of an animal. This color was most commonly used as the symbol for the rivers, waters, and lakes, also the skies. Certain tribes even used it for mountains in the distance. It stands for sincerity and happiness. Berries formed a large portion of the natural materials for this color. Western clay and pigments of the canyons also lent varying hues to this effective color. The natural abundant materials made this color a very popular and predominating one. Clays, roots, and tannic barks furnished the natives with dyes. Yellow reflects the symbol of the sun, light and happiness. Yellow dye is readily make from tree moss. It may easily be realized that this color represents the earth, the hills, the trees, and mountains, so common in all Indian legends. This color may be obtained by mixing two primary colors, yellow and blue, or it may be made from simple acid action on copper. In certain sections of the west and northwest copper was rather abundant. Other parts of the country used the juice of grasses. Huckleberries give a very good substance for dyeing and the Indians used this commonly. Purple is an excellent color for recessed Portions of the carving and for symbols of a reverent nature. It stood for mountains in the distance and general conventionalized signs. Mud from sulphur springs and other earth deposits made this color available to the Indian. As a rule it stood for power. Painting the Totem After the pole or object of craftsmanship has been completed and the incised parts carefully cleaned out to give sharp, distinct markings and shadows, preparations for painting should start. Where knots are conspicuous and when fairly unseasoned wood has been used, it is advisable to give them a coating of shellac to prevent the resin from running out and spoiling the finished effect. Be sure the object is clean and that all particles of dust and dirt have been removed. There are two common ways of painting the pole. One is while it is on the horses or on the ground, and the other method is to paint it after it is erected. If the pole is fairly short a better finished job can be accomplished after it has been erected, as nicks and rope rubs will be avoided. Some people, however, prefer to paint even large poles after they are erected, contending that one can see the pole as it looks from a distance, and thus make improvements in color effects not realized or visualized in the rough preliminary studies and sketches. You can see in the illustration Treasure Island Philadelphia Camp that this Scout preferred to paint the pole after it was up and has used the steeplejack method of slinging a rope around and adjusting it as he painted. Colors The Indians originally used pigments made from clay and roots. The colors were very bright and became subdued after the pole had weathered several winters. The symbolism of the colors changed a little in different parts of the United States. Therefore we have attempted to give only a general meaning to the prevalent shades. There are three primary colors--red, blue, and yellow. From these three colors any other colors may be created by the correct combination and mixing. However, nowadays colors come already mixed in practically any shade you desire, at a price that depends mainly on the quality. For large camp work a reasonably priced paint is perfectly good enough. On pieces of carving or other objects mentioned in the discussion of Craftsmanship Gifts , etc. Enamels, lacquer, Duco and common show-card colors may be used, the object, the object cannot be subjected to much handling or water as the tempera show-card color is not permanent.
