Posted on October 28, 29 Comments America lost a valuable source of feminist craziness when Professor Joyce Trebilcot died in at age For more than three decades, Trebilcot supplied the feminist movement with its necessary raw material "insanity" and in its obituary of this distinguished academic, Washington University St. Louis described her contributions: She served as coordinator of the program from A founding member of the Society for Women in Philosophy and of the editorial board of Hypatia: Professor Trebilcot left behind a lesbian widow, her partner Jan Crites, as well as a formidable body of insane feminist writings. The question is, after all, not what women and men naturally are, but what kind of society is morally justifiable. In order to answer this question, we must appeal to the notions of justice, equality, and liberty. It is these moral concepts, not the empirical issue of sex differences, which should have pride of place in the philosophical discussion of sex roles. Her book Dyke Ideas: The methods I discuss in this essay are, most narrowly conceived, methods for using language. They are, therefore, methods for a great deal else as well "experiencing, thinking, acting. This explains why feminism, unlike some other fads of its era, has proven so remarkably persistent. Alternatively, she can apply for a job as a hotel desk clerk , or work for a nonprofit like the Feminist Majority Foundation. If all else fails, she can become a radical feminist blogger and proclaim to the world: What has happened is that unrealistic beliefs about men, women and sex have obtained intellectual prestige. These beliefs have gained institutional authority from the hegemonic influence of feminism within academia and, inevitably, once the lunatics took over the asylum, they acquired political power sufficient to legislate crazy laws. How has this happened? All that was necessary, to a feminist with a Ph. No argument was too ludicrous for publication, if it served a feminist purpose. Begin by discussing evidence regarding general psychological differences between men and women and then "abracadabra! As a formula for insanity, feminism rivals LSD in its potency. Permit me to digress. It has always been my belief, based on extensive youthful experience with crazy dopeheads, that Mary Daly must have had at least a few LSD trips. This is a digression, I say, but not entirely irrelevant to understanding the fundamental unrealism of feminist thought. What the historians generally fail to mention, however, is that the emergence of feminism also occurred at time when heavy experimentation with hallucinogens was commonplace among young radicals. Perhaps not every radical woman of that era was a user of hallucinogens, but there were obviously enough Cosmic Space Travelers among them to form a critical mass of craziness. The feminist book For Lesbians Only: There were two stages. Men "male voices" would overhear my thoughts and want to get in. The second stage was control. The invaders not only wanted to get in, they wanted to take me over once they were in. This then is the core of the craziness "invasion and control, and the threat of invasion and control. I was drawn to participate, to allow the connection to happen, but at the same time I would repeatedly block. I would regularly block when it seemed that intense, shared experience was in the offing. As a result, I was in almost continuous emotional turmoil. I cried a lot, and punished myself, and traveled, moving repeatedly to new places in order to try again with new groups of people. Google searches for that phrase turn up a lot of New Age mystical stuff, some of it related to tantric Buddhism. Al-Ghazali considered the possibility that this third way of knowing, the one that might be superior to ratiocination, was the mystic or ecstatic communion experienced by the Sufis. It is one of the most powerful forces in human history, and also one of the least understood. Did I mention Professor Trebilcot is a lesbian? I now understand all these refusals as resistances to rape, that is, to invasion and control by others. My interpretation of these experiences has shifted over the years. At the most painful time, it seemed to me that what was going on was that I wanted to do what they wanted me to, I wanted to participate in what was going on, but I simply could not, I was unable, I did not know how. I now understand this nonparticipation not as inability, but as refusal: And the reason I would not

is that I wanted to protect myself from the assault, from the intrusion, from the loss of my own will. I resisted in order to continue as an individual “ in order not be submerged, subjected, merged. This resistance to control. Doing drugs and getting humped by a smelly existentialist art student, maybe? Feminism is a journey to lesbianism. The fact that few people outside academia recognize the name Joyce Trebilcot should not lead us to believe that she was not influential, nor should we suppose that a professor who retired in has no relevance for the meaning of feminism today. From her Wikipedia page: Joining the faculty in the philosophy department at Wisconsin straight from her Harvard studies, Card has been a significant voice there, and in the profession, ever since. Card has written 4 treatises, edited or co-edited 6 books, published nearly articles and reviews. She has delivered nearly papers at conferences, colleges, and universities and has been featured in 29 radio broadcasts. In , Card was invited to deliver the prestigious Paul Carus Lectures, a series of 3 lectures delivered to the American Philosophical Association; these will be delivered at the Central Division in Notes on the Logic of Feminism. Robert Backer and Frederick Elliston. Expanded Definition of Activism. Reprinted in Gossip 3 n. Hortense and Gladys on Money. In case you lost count, nine separate works by Joyce Trebilcot were cited in this page book by the influential Professor Card, a book published by a prestigious academic press. Thus were these various works that Professor Trebilcot published between and incorporated into the framework of Professor Card which in turn, we may be sure, has been cited by numerous other feminist scholars since. Acquiring intellectual respectability through the accretion of essays, articles, conference papers and books, academic feminism acquires its scholarly pedigree. The Feminism-Industrial Complex, as some have called it, thus comprises a vast enterprise that controls with hegemonic power the right to speak about men, women, sex, marriage and family, so that any campus discourse on these topics is subject to being vetoed or silenced if it does not comport with feminist theory. The feminist lunatics are running the asylum of higher education, and no one should be surprised by the episodic outbreaks of craziness that result. Academia is learning that its attempts to create victim-free campuses “ by making everyone hypersensitive, even delusional, about victimizations “ brings increasing supervision by the regulatory state that progressivism celebrates. As those familiar with feminist theory know, feminists advocate lesbianism on a variety of grounds. Another approach is based on the claim that in patriarchy, equality in a heterosexual relationship is impossible. A third argument holds that women committed to feminism should give all their energies to women. In coming out, one connects an already-existing reality “ sensations, feelings, identification with women “ with a new understanding or concept of who one is. To discover that one has been a lesbian all along is to interpret past experiences in a new way. But coming out involves also deciding to be a lesbian, which is to say deciding not to participate in the institution of heterosexuality and to. Patriarchy, although it takes different forms in different cultures, always depends on the ability of men to control women through heterosexuality. Were large numbers of women to take responsibility for our own sexuality and in doing so reject heterosexuality, the very concepts of woman and man would be shattered. Professor Trebilcot was crazy, not stupid. Freudianism has always struck me as ludicrous, but in wading through dozens of volumes of feminist theory over the past few months, I have seen author after author devote herself either to debunking Freud or adapting his theories to feminist purposes. You see this most obviously when it comes to the subject of lesbian motherhood. Even though lesbian mothers and their children live in a heteronormative world where the phallus represents power, privilege, and often pleasure, these cultural meanings do not necessarily hold sway in the lesbian mother household. James has a penis. John has a penis. Danny has a penis. Moreover, even if lesbian mothers. Sometimes a penis is just a penis. Yes, we acknowledge that children of same-sex households can and do live useful and productive lives. I choose as the reference point because it was that year, in the Windsor decision, that the Supreme Court normalized same-sex marriage.

Hyacinth Piel on gender ethics by Derrick Clifton During the latest lecture in the Lavender University series, attendees were invited to consider various moral questions for how people understand and develop gender identities. Piel prefers the gender-neutral pronouns "ze" and "hir. Not conforming often meant, and still results in punishment and death, creating what Piel described as a system of hierarchies often opposed by feminists. The lecture was based on a feminist philosophy class Piel taught at UIC. The course, titled "Sex Roles," was the first time ze included discussion of a paper examining two perspectives of gender identity. One such form, termed monoandrogynism, combines masculinity and femininity into one, best possible hybrid for individuals, excluding the problematic or restrictive portions of each. In contrast, polyandrogynism suggests that each person should be able to freely develop and express their gender identity from a range of possibilities and combinations. During the lecture, Piel said polyandrogynism functions as the "common sense" of trans politics. Both types of androgyny were examined for their positive and negative effects, as Piel introduced a few ethical challenges and criticisms of each ideal. In either strain, ze said, there are calls to a certain ideals of excellence. As a result, ze stressed the need for individuals to examine how they do gender. So, we need to be reflective about our own identities and our own ways of presenting," Piel said. Richie will present the next Lavender University lecture on Saturday, Feb. Then, I volunteered to teach Sunday school to kindergarteners at my church. Yet who am I to judge Elizabeth Bruenig? My adolescence was spent in a noisy haze of Pink Floyd, Led Zeppelin and whatever drugs I could get my hands on which, considering that my best friend was a dealer, was quite a lot. He describes himself thus: My writing is informed by a leftist political perspective that draws upon a diverse set of historical and contemporary leftist intellectuals. In particular, the various theories of egalitarian distributive justice that began with John Rawls have had the most influence on me. The politics, of course, inform the journalism. For better or worse almost certainly worse , rape is a contested political property, and campus rape is its pinnacle. We pause to note that, in Mrs. So I guess Robert Carle is a spectrum all to himself. But never mind that. More importantly, similar political groupings tend to form around controversial cases. What accounts for the political polarization in rape journalism, which is presumably odious to everyone, regardless of political orientation? The left tends to view oppression as something that operates within systems, sometimes in clearly identifiable structural biases, and other times in subtle but persistent ways. Making sense of oppression, therefore, requires looking at entire systems of oppression, not just specific instances or behaviors. The right, on the other hand, tends to understand politics on the individual level, which fits in neatly with a general obsession with the capital-i Individual. And if a few highly publicized rapes turn out to be murkier than first represented, then rape itself is not a crisis, just a regrettable and rare anomaly. Read the whole thing. Bruenig believes that female students at the University of Virginia or at any other U. Is it not rather the case that university students in the United States are among the most fortunate and affluent people in the entire world? Feminists and their political allies, including both President Obama and Vice President Biden, have repeatedly claimed that 1-in-5 female college students are victims of sexual assault. Bruenig decries " is that feminists who craved money and power enlisted the assistance of Democrat politicians and liberal journalists to advance a deliberate deceit. Even a courtroom acquittal " a not-guilty verdict " was insufficient to protect male students from being expelled or suspended simply because they had been accused. These two things are related, you see. This award is named in honor the late and indisputably crazy lesbian feminist, Professor Joyce Trebilcot. It is these moral concepts, not the empirical issue of sex differences, which should have pride of place in the philosophical discussion of sex roles. Liberal journalists lie about rape. They also lie about murder, racism, economics, foreign policy, "global warming" and everything else.
