

Chapter 1 : Can anyone print this PDF with Acrobat Reader?

A completed Payee Data Record, STD form, is required for all payees (non-governmental entities or individuals) entering into a transaction that may lead to a payment from the state. Each state agency requires a completed, signed, and dated STD on.

Many of you may have received a version of the announcement and invitation to participate in your e-mail boxes, but we wanted to post it here to reiterate how important opportunities such as these are to make significant and positive change through the built environment. What You Need to Know to Enter: This initiative was designed specifically to engage seven qualified firms to provide training services through the development of seven conceptual case studies in school energy and water reduction on seven distinct school campuses. The focus of the training program is to provide school board members and facilities directors, as well as legislators and other decision makers, with creative yet practical, examples for reducing their energy costs and water consumption both within buildings and externally in the landscape while simultaneously improving the built environment for quality education. The following will be important to the success of the program: Cost of construction, while obviously important, can be significantly trumped by life-cycle cost savings. The resulting life-cycle savings can then be transferred to educational programs. Innovative, energy-and water-focused design can highlight energy and water consumption awareness and, therefore, have an impact on how future generations view their role in the sustainability of our planet. With Zero Net Energy ZNE as the aspirational goal, and reduction of water consumption as a requirement, DSA intends to engage seven architectural teams as trainers in the presentation of seven conceptual design scenarios for seven distinct school campuses. It is intended that each scenario will include a typical classroom building and a typical multi-purpose building, gymnasium or similar building. A typical urban school with limited available land. A typical suburban school. A typical rural school. A typical school located in a desert climate. A school housed in a building that is recognized as being historically significant. A typical, multi-story community college building. Each training team will be assigned a different scenario and will be provided electronic versions of the original working drawings for the buildings. Prior to commencement of the design process, it is anticipated that the California Energy Commission will provide an existing energy use model for each scenario. Upon completion of the design process, DSA will engage two separate teams to provide a construction cost estimate and Life-Cycle Cost Analysis for each element of the various scenarios. As an architect and a former architectural firm owner, State Architect, Chet Widom, FAIA, would like for everyone to consider that this initiative goes beyond monetary investment. If you believe that your firm is able to offer these services, please submit a two-page, maximum, letter of interest with a minimum font size of 11, identifying the roles and responsibilities of the training team members and information about the firm. The letter should include: Demonstration of a minimum combined 20 years of experience among the training team. Any additional relevant information. Letters more than two pages in length will automatically be disqualified. It should be noted that this is not a competitive award process and seeks only to gain an understanding of the availability of services within the market. Based on the response, DSA may opt to request additional information from one or more of the firms that submit a letter of interest, in order to make a determination of the final firms. Please note that should a firm be awarded a contract, they will need to complete the following, as directed and provided by the Acquisition Analyst at DGS: General Terms and Conditions GTC, which can be viewed and downloaded at the following internet site: All letters of interest should be submitted electronically, via email, to Jordan Aquino at Jordan.

Chapter 2 : D Granting compensation to the CA Mobilehome and Resource Action Assoc.

For hard copies of standard (STD) forms, please order from the Office of State Publishing (OSP) (opens OSP STD Forms) Search for all standard (STD) forms using the Forms Management Center's (FMC) search engine.

Chapter 4 : 7x7x7: Case Studies in School Energy and Water Reduction - AIACC

A completed Payee Data Record, STD. , is required for payments to all non-governmental entities and will be kept on file at each State agency. Since each State agency with which you do business must have a separate STD. on file, it is possible for a payee.
